State's comments, and the NRC plans to review the results of the licensee's soil contamination survey.

# III. Finding of No Significant Impact

The NRC staff have concluded that the proposed decommissioning project at Robins AFB, Georgia, will have minimal impacts on the environment. The NRC staff considered the impacts on land use, transportation, geology and soils, water resources, ecology, air quality, noise, historical and cultural resources, visual and scenic resources, socioeconomic resources, public and occupational health, and waste management. The staff also determined that the affected environment and the environmental impacts associated with the decommissioning of Building 181 are bounded by the impacts evaluated by NUREG-1496, Volume 1, "Generic

Environmental Impact Statement in Support of Rulemaking on Radiological Criteria for License Termination of NRC-Licensed Nuclear Facilities" (ADAMS Accession No. ML042310492).

The staff finds that the proposed decommissioning complies with 10 CFR 20.1402, which provides the radiological criteria for unrestricted use. Further, the licensee will perform the remediation work under an NRC license, using an NRC-approved decommissioning plan, which will help ensure that the licensee and its contractor will establish and implement programs to protect workers, the public, and the environment. Further, the NRC plans to conduct inspections during work activities. Past NRC experiences with decommissioning activities at similar sites suggest that public and worker exposures to radioactivity will

be far below the limits specified in 10 CFR part 20.

The NRC staff have prepared this EA in support of the proposed action to amend NRC Materials License 42– 23539–01AF to approve the licensee's proposed DP for Building 181 at Robins AFB. On the basis of this EA, the NRC has concluded that there are no significant environmental impacts and the license amendment does not warrant the preparation of an environmental impact statement. Accordingly, it has been determined that a FONSI is appropriate.

### **IV. Availability of Documents**

The documents identified in the following table are available to interested persons through one or more of the following methods, as indicated.

### NUCLEAR REGULATORY COMMISSION

### [NRC-2017-0107]

## Information Collection: Fitness-for-Duty Programs

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of submission to the Office of Management and Budget; request for comment.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) has recently submitted a request for renewal of an existing collection of information to the Office of Management and Budget (OMB) for review. The information collection is entitled, "Fitness-for-Duty Programs."

**DATES:** Submit comments by October 19, 2017.

ADDRESSES: Submit comments directly to the OMB reviewer at: Aaron Szabo, Desk Officer, Office of Information and Regulatory Affairs (3150–0146), NEOB– 10202, Office of Management and Budget, Washington, DC 20503; telephone: 202–395–3621, email: *oira\_ submission@omb.eop.gov.* 

FOR FURTHER INFORMATION CONTACT: David Cullison, NRC Clearance Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: INFOCOLLECTS.Resource@nrc.gov. SUPPLEMENTARY INFORMATION:

## I. Obtaining Information and Submitting Comments

#### A. Obtaining Information

Please refer to Docket ID NRC-2017-0107 when contacting the NRC about the availability of information for this action. You may obtain publiclyavailable information related to this action by any of the following methods: • Federal Rulemaking Web site: Go to http://www.regulations.gov and search for Docket ID NRC-2017-0107. A copy of the collection of information and related instructions may be obtained without charge by accessing Docket ID NRC-2017-0107 on this Web site.

 NRC's Agencywide Documents Access and Management System (ADAMS): You may obtain publiclyavailable documents online in the ADAMS Public Documents collection at http://www.nrc.gov/reading-rm/ adams.html. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to *pdr.resource@nrc.gov*. The supporting statement and NRC Forms 890, 891, and 892 are available in ADAMS under Accession Nos. ML17236A379, ML17013A578, ML17013A598, and ML17024A436, respectively.

• *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One

White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

• NRC's Clearance Officer: A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email:

INFOCOLLECTS.Resource@nrc.gov.

## B. Submitting Comments

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC posts all comment submissions at *http:// www.regulations.gov* as well as entering the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

### II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, "Fitness-for-Duty Programs." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** (FR) notice with a 60-day comment period on this information collection on June 1, 2017, 82 FR 25345.

1. The title of the information collection: 10 CFR part 26, "Fitness-for-Duty Programs."

- 2. OMB approval number: 3150–0146.
- 3. *Type of submission:* Extension.
- 4. The form number if applicable:

NRC Form 890, "Single Positive Test Form," NRC Form 891, "Annual Reporting Form for Drug and Alcohol Tests," and NRC Form 892, "Annual Fatigue Reporting Form." 5. *How often the collection is required or requested:* Annually and on occasion. The NRC receives reports on an annual basis that detail fitness-for-duty (FFD) program performance. The NRC also receives, on occasion, reports associated with FFD policy violations or programmatic failures. Depending on the type of violation or programmatic failure, the report would be made within 24 hours of the event occurrence, or within 30 days of completing an investigation into the programmatic failure.

6. Who will be required or asked to respond: Nuclear power reactor licensees licensed under parts 50 and 52 of title 10 of the Code of Federal Regulations (10 CFR) (except those who have permanently ceased operations and have verified that fuel has been permanently removed from the reactor); all holders of nuclear power plant construction permits and early site permits with a limited work authorization and applicants for nuclear power plant construction permits that have a limited work authorization under the provisions of 10 CFR part 50; all holders of a combined license for a nuclear power plant issued under 10 CFR part 52 and applicants for a combined license that have a limited work authorization; all licensees who are authorized to possess, use, or transport formula quantities of strategic special nuclear material (SSNM) under the provisions of 10 CFR part 70; all holders of a certificate of compliance of an approved compliance plan issued under 10 CFR part 76, if the holder engages in activities involving formula quantities of SSNM; and all contractor/ vendors (C/Vs) who implement FFD programs or program elements to the extent that the licensees and other entities listed in this paragraph rely on those C/V FFD programs or program elements to comply with 10 CFR part 26.

7. The estimated number of annual responses: 441,833 responses (215 reporting responses + 49 recordkeepers + 441,569 third-party disclosure responses).

8. The estimated number of annual respondents: 88,229 respondents (28 drug and alcohol testing programs + 21 fatigue management programs + 88,180 third-party disclosure respondents).

9. An estimate of the total number of hours needed annually to comply with the information collection requirement or request: 719,195.9 hours (6,168.0 hours reporting + 220,998.5 hours recordkeeping + 492,029.4 hours thirdparty disclosure).

10. *Abstract:* The NRC's regulations in 10 CFR part 26 prescribe requirements

to establish, implement, and maintain FFD programs at affected licensees and other entities. The objectives of these requirements are to provide reasonable assurance that persons subject to the rule are trustworthy, reliable, and not under the influence of any substance, legal or illegal, or mentally or physically impaired from any cause, which in any way could adversely affect their ability to safely and competently perform their duties. These requirements also provide reasonable assurance that the effects of fatigue and degraded alertness on individuals' abilities to safely and competently perform their duties are managed commensurate with maintaining public health and safety. The information collections required by 10 CFR part 26 are necessary to properly manage FFD programs and to enable effective and efficient regulatory oversight of affected licensees and other entities. These licensees and other entities must perform certain tasks, maintain records, and submit reports to comply with 10 CFR part 26 drug and alcohol and fatigue management requirements. These records and reports are necessary to enable regulatory inspection and evaluation of a licensee's or other entity's compliance with NRC regulations, FFD performance, and significant FFD-related events to help maintain public health and safety, promote the common defense and security, and protect the environment.

Dated at Rockville, Maryland, this 14th day of September, 2017.

For the Nuclear Regulatory Commission. **David Cullison**,

NRC Clearance Officer, Office of the Chief Information Officer.

### PENSION BENEFIT GUARANTY CORPORATION

## Proposed Submission of Information Collection for OMB Review; Comment Request; Annual Reporting (Form 5500 Series)

**AGENCY:** Pension Benefit Guaranty Corporation.

**ACTION:** Notice of intent to request extension of OMB approval, with modifications.

**SUMMARY:** The Pension Benefit Guaranty Corporation (PBGC) intends to request that the Office of Management and Budget (OMB) extend approval (with modifications), under the Paperwork Reduction Act of 1995, of its collection of information for Annual Reporting under OMB control number 1212–0057,
