### Census Bureau

#### **Proposed Information Collection; Comment Request; Pilot of USPS Postal Carriers as Census Enumerators During the 2018 End-to-End Census Test**

**AGENCY:** U.S. Census Bureau, Commerce.

**ACTION:** Notice.

**SUMMARY:** The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

**DATES:** To ensure consideration, written comments must be submitted on or before November 20, 2017.

**ADDRESSES:** Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at [PRAComments@doc.gov](mailto:PRAComments@doc.gov)).

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Robin A. Pennington, U.S. Census Bureau, 4600 Silver Hill Road, Washington, DC 20233 (or via the internet at [robin.a.pennington@census.gov](mailto:robin.a.pennington@census.gov)).

#### **SUPPLEMENTARY INFORMATION:**

##### **I. Abstract**

The U.S. Census Bureau proposes a proof of concept study on the use of United States Postal Service (USPS) Postal Carriers as Census Bureau enumerators as part of the 2018 End-to-End Census Test. The possibility of formally using Postal Carriers to conduct enumeration as part of Decennial Census operations has been proposed or suggested several times in

recent years by Members of Congress, as well as other advisory and oversight bodies, in response to (1) the rising operational costs of both agencies, and (2) the need for familiarity with local addresses. The suggestions often note that the USPS maintains a permanent, well trained, and experienced labor force that possesses significant public trust and detailed knowledge of the addressing and residential patterns in communities they serve.

The rationale for this study is to test and observe the feasibility of the use of Postal Carriers as enumerators in the context of an existing Census Test, and, thereby, enable the Census Bureau and USPS to better respond to stakeholder inquiries about the feasibility of such activities. The potential long-term advantages to the Census Bureau include: (1) Leveraging local USPS knowledge about households to pinpoint the best time for an interview, (2) increasing the pool of enumerators without hiring new temporary staff, and (3) providing a more flexible landscape for how and when Nonresponse Followup (NRFU) interviews occur during the enumeration phase of a census.

The Census Bureau plans to conduct a pilot in two ZIP Codes outside of—but adjacent to—the 2018 End-to-End Census Test site location in Providence County, R.I. The pilot will involve approximately 40 Postal Carriers operating out of two ZIP Codes, 02760 located in North Attleboro, MA, and 02888 located in Warwick, RI.

The proposed evaluation and deliverables are:

(1) The numbers of resolved enumeration cases will be documented to determine whether Postal Carriers were able to successfully conduct assigned NRFU activities.

Documentation will identify and describe challenges and opportunities for future collaborative participation in this operation.

(2) A report that details the development of baseline metrics to describe costs and benefits of a future collaborative operation. This study will determine the information needed to assess cost differences/savings to recruiting and staff-onboarding operations by using existing USPS employees, and the value added in terms of efficiency and quality of NRFU activities, measured by numbers of visits, of using Postal Carriers with local knowledge.

(3) Results of focus group debriefings held with the Postal Carriers, their managers, and the public after the 2018 End-to-End Census Test enumeration phase is complete to describe and

characterize the impacts of this collaboration on agency operations and the public trust.

Documented operational Lessons Learned from the entirety of the project and recommendations for next steps will accompany the report. The outcome of this pilot study will provide the Census Bureau and the USPS with baseline descriptive and qualitative information that can be used to inform future field-based collaborations.

## II. Method of Collection

Census Bureau staff will train Postal Carriers to successfully conduct enumeration to complete the activity. Postal Carriers will be sworn to uphold the same confidentiality as Census Bureau employees. They will perform enumeration functions using the same procedures and automation as other enumerators during the hours of 5 p.m.–8 p.m. on weekdays, variable weekend hours, and both inside and outside the geographic constraints of their assigned routes.

#### SUPPLEMENTARY INFORMATION

##### I. Abstract

The U.S. Census Bureau plans to request a three-year extension of the current Office of Management and Budget (OMB) clearance of the Survey of Housing Starts, Sales and Completions, also known as the Survey of Construction (SOC). We also plan revisions to the current collection. The SOC collects monthly data on new residential construction from a sample of owners or builders. The Census Bureau uses the Computer-Assisted Personal Interviewing (CAPI) electronic questionnaires SOC–QI/SF.1 and SOC–

QI/MF.1 to collect data on start and completion dates of construction, physical characteristics of the structure (floor area, number of bathrooms, type of heating system, etc.), and if applicable, date of sale, sales price, and type of financing. The SOC provides widely used measures of construction activity, including the economic indicators Housing Starts and Housing Completions, which are from the New Residential Construction series, and New Residential Sales.

After working with the survey sponsor and key data users, the Census Bureau has decided to add one new data item to the single-family questionnaire regarding ceiling height.

With respect to survey burden, the Census Bureau samples about 1,620 new buildings each month (19,440 per year). Census Bureau staff inquire about the progress of each building multiple times until it is completed (and a sales contract is signed, if it is a single-family house that is built for sale). For single-family buildings, there are an average of 8.11 interviews and for multifamily buildings, an average of 7.0 interviews. The total number of interviews conducted each year for single-family buildings is about 102,186 and for multifamily buildings is about 47,880. Each interview takes 5 minutes on average. Therefore, the total annual burden is 12,506 hours.

## II. Method of Collection

The Census Bureau uses its field representatives to collect the data through CAPI.

## III. Data
