SUPPLEMENTARY INFORMATION:

A. Purpose

The FAR requires certain information to be provided by contractors which

would enable the Government to make payments under the contract by electronic funds transfer (EFT). The information necessary to make the EFT transaction is specified in clause 52.232-33, Payment by Electronic Funds Transfer—System for Award Management, which the contractor is required to provide prior to award, and clause 52.232-34, Payment by Electronic Funds Transfer—Other than System for Award Management, which requires EFT information to be provided as specified by the agency to enable payment by EFT. This collection of information is mostly imposed on contractors upon award of each contract. Less frequent collection would not facilitate contract payment by EFT as the standard method of payment under Government contracts.

DoD, GSA and NASA analyzed the FY 2016 data from the Federal Procurement Data System (FPDS) to develop the estimated burden hours for this information collection. The burden was adjusted to reflect that the information required by the clause at 52.232-33, Payment by Electronic Funds Transfer—System for Award Management, is already covered by OMB Control Number 9000-0159, System for Award Management Registration (SAM).

B. Annual Reporting Burden

Respondents: 3,761.

Responses per Respondent: 1.

Annual Responses: 3,761.

Hours per Response: 0.5.

Total Burden Hours: 1,881.

C. Public Comment

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405, telephone 202-501-4755. Please cite OMB Control No. 9000-0144, Payment by Electronic Funds Transfer, in all correspondence.

SUPPLEMENTARY INFORMATION: On February 16, 2016 CDC published a Notice of Availability for the Final Environmental Assessment (2016 Final EA) and Finding of No Significant Impact (FONSI) for the HHS/CDC's Lawrenceville Campus Proposed Improvements 2015-2025 (81 FR 7800). The proposed improvements identified in the 2016 Final EA included (1) building demolition; (2) new building construction, including an approximately 12,000 gross square feet (gsf) Science Support Building, a new Transshipping and Receiving Area at approximately 2,500 gsf and two new Office Support Buildings at approximately 8,000 gsf and 6,000 gsf; (3) expansion and relocation of parking on campus; and (4) the creation of an additional point of access to the campus and pedestrian improvements. The 2016 Final EA concluded that no significant impacts to the human or natural environment would result and HHS/CDC issued a FONSI.

Since completion of the 2016 Final EA and FONSI, HHS/CDC proposed changes to the Proposed Action. HHS/CDC has revised the EA to include the installation of a photovoltaic system within the northern portion of the campus. The photovoltaic system would consist of a 249.9-kilowatt (KW) ground-mounted solar array covering an area of approximately 41,750 sf (0.99 acre). The proposed photovoltaic system would provide the Lawrenceville Campus with

a renewable energy source in order to comply with federal renewable energy mandates.

The revised EA evaluates the potential environmental impacts of the proposed photovoltaic system, along with the proposed improvements identified in the 2016 Final EA. Potential impacts of the No Build and the Build Alternative are evaluated on the following resource categories: Socioeconomics; land use; zoning; public policy; community facilities; transportation; air quality; noise; cultural resources; urban design and visual resources; natural resources; utilities; waste; and greenhouse gases and sustainability.

Dated: September 18, 2017.

Lauren Hoffman,

Acting Executive Secretary, Centers for
Disease Control and Prevention.
