Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: On September 19, 2008, the Commission adopted a Second Report and Order, FCC 08-208, which added a new section 80.231, which requires that manufacturers of Class B Automatic Identification Systems (AIS) transmitters for the Marine Radio Service include with each transmitting device a statement explaining how to enter static information accurately and a warning statement that entering inaccurate information is prohibited. The Commission is seeking to extend this collection in order to obtain the full three-year clearance from OMB. Specifically, the information collection requires that manufacturers of AIS transmitters label each transmitting

device with the following statement: WARNING: It is a violation of the rules of the Federal Communications Commission to input an MMSI hat has not been properly assigned to the end user, or to otherwise input any inaccurate data in this device. Additionally, prior to submitting a certification application (FCC Form 731, OMB Control Number 3060-0057) for a Class B AIS device, the following information must be submitted in duplicate to the Commandant (CG-521), U.S. Coast Guard, 2100 2nd Street SW., Washington, DC 20593-0001: (1) The name of the manufacturer or grantee and the model number of the AIS device; and (2) copies of the test report and test data obtained from the test facility showing that the device complies with the environmental and operational requirements identified in IEC 62287-1. After reviewing the information described in the certification application, the U.S. Coast Guard will issue a letter stating whether the AIS device satisfies all of the requirements specified in IEC 62287-1. A certification application for an AIS device submitted to the Commission must contain a copy of the U.S. Coast Guard letter stating that the device satisfies all of the requirements specified in IEC-62287-1, a copy of the technical test data and the instruction manual(s).

These reporting and third party disclosure requirements aid the Commission monitoring advance marine vessel tracking and navigation information transmitted from Class B AIS devices to ensure that they are accurate and reliable, while promoting marine safety.
