Determination of Overfishing or an Overfished Condition

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: This action serves as a notice that NMFS, on behalf of the Secretary of Commerce (Secretary), has found that the following stocks are, or remain, subject to overfishing or overfished: South Atlantic red grouper, Gulf of Mexico greater amberjack, and Northwestern Atlantic witch flounder. NMFS, on behalf of the Secretary, notifies the appropriate fishery management council (Council) whenever it determines that overfishing is occurring, a stock is in an overfished condition, or a stock is approaching an overfished condition.

FOR FURTHER INFORMATION CONTACT: Regina Spallone, (301) 427–8568.

SUPPLEMENTARY INFORMATION: Pursuant to section 304(e)(2) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1854(e)(2), NMFS, on behalf of the Secretary, must notify Councils, and publish in the **Federal Register**, whenever it determines that a stock or stock complex is subject to overfishing, overfished, or approaching an overfished condition.

NMFS has determined that South Atlantic red grouper is subject to overfishing and overfished. This determination is based on the most recent stock assessment (SEDAR 53), finalized in 2017, using data through 2015. This assessment supports a finding of subject to overfishing because the current estimate of fishing mortality (F) is above the maximum fishing mortality threshold (MFMT), and overfished because the spawning stock biomass estimate is less than the
