

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a proposed collection of information to OMB for review entitled, "Solicitation of Non-Power Reactor Operator Licensing Examination Data." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on May 18, 2017, 82 FR 22865.

1. *The title of the information collection:* Solicitation of Non-Power Reactor Licensing Examination Data.
2. *OMB approval number:* An OMB control number has not yet been assigned to this proposed information collection.
3. *Type of submission:* New.
4. *The form number if applicable:* Not applicable.
5. *How often the collection is required or requested:* Annually.
6. *Who will be required or asked to respond:* All holders of operating licenses for non-power reactors under the provision of part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), "Domestic Licensing of Production and Utilization Facilities," except those that have permanently ceased operations and have certified that fuel has been permanently removed from the reactor vessel.
7. *The estimated number of annual responses:* 31.
8. *The estimated number of annual respondents:* 31.
9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* 31 (One (1) hour per respondent, annually).

10. *Abstract:* The NRC is requesting a new clearance to annually request all non-power reactor licensees and applicants for an operating license to voluntarily send to the NRC: (1) Their projected number of candidates for initial operator licensing examinations, and (2) the estimated dates of the examinations. This information is used to plan budgets and resources in regard to operator examination scheduling in order to meet the needs of the non-power nuclear community.

SUPPLEMENTARY INFORMATION: The NRC is withdrawing RGs 5.13 published on December 6, 1973 (38 FR 33629), and 5.33 published on July 9, 1974 (39 FR 25259) because this guidance has been incorporated into RG 5.88, "Physical Inventories and Material Balances at Fuel Cycle Facilities," (ADAMS Accession No. ML17167A292) and RGs 5.13 and 5.33 are therefore no longer needed. These two RGs were issued by the NRC staff in the 1970s to provide guidance that was considered acceptable for complying with the NRC's regulations related to the performance, evaluation, and reporting of physical inventories and material balances at fuel cycle facilities. Regulatory Guide 5.88 is being issued to update the guidance that is being withdrawn.

I. Further Information

The withdrawal of RGs 5.13 and 5.33 does not alter any prior or existing NRC licensing approval or the acceptability of licensee commitments made regarding the withdrawn guidance. Although RGs 5.13 and 5.33 are withdrawn, current licensees referencing these RGs may continue to do so, and withdrawal does not affect any existing licenses or agreements. However, by withdrawing RGs 5.13 and 5.33, the NRC no longer approves reliance upon such guidance in future requests or applications for NRC licensing actions.
