[Docket No. EF17–3–000]

Bonneville Power Administration; Order Approving Rates on an Interim Basis and Providing Opportunity for Additional Comments

Before Commissioners: Neil Chatterjee, Chairman; Cheryl A. LaFleur, and Robert F. Powelson.

1. In this order, we approve on an interim basis Bonneville Power Administration's (Bonneville) proposed 2018–2019 transmission rates, with the exception of the rates for transmission service on the Southern Intertie, which are addressed separately in another order, pending our further review. We also provide an additional period of time for parties to file comments.

I. Background

2. On July 31, 2017,¹ Bonneville filed a request for interim and final approval of its transmission rates² in accordance with section 7 of the Pacific Northwest Electric Power Planning and Conservation Act (Northwest Power Act)³ and Part 300 of the Commission's regulations.⁴ Bonneville projects that the filed rates will produce average annual transmission revenues of \$1.044 billion and annual net revenues of \$4.65 million.⁵ Bonneville asserts that this level of annual revenues is sufficient to recover its costs for the 2018–2019 rate approval period, while providing cash flow to ensure at least a 95 percent

¹ Bonneville submitted errata filings on August 7, 2017, and August 10, 2017, respectively, to correct various attachments to the July 31, 2017 Transmittal Letter and to add inadvertently omitted documents to the record.

² The proposed transmission rates for which Bonneville seeks approval for the period of October 1, 2017 through September 30, 2019 are: Formula Power Transmission Rate (FPT–18.1); Formula Power Transmission Rate (FPT–18.3); Integration of Resources Rate (IR–18); Network Integration Rate (NT–18); Point-to-Point Rate (PTP–18); Montana Intertie Rate (IM–18) (IM Rate); Use-of-Facilities Transmission Rate (UFT–18); Advance Funding Rate (AF–18); Townsend-Garrison Transmission Rate (TGT–18); WECC and Peak Service Rate (PW–18); Oversupply Rate (OS–18); Eastern Intertie Rate (IE–18); Ancillary and Control Area Services Rates (ACS–18); and Transmission General Rate Schedule Provisions. Bonneville July 31, 2017 Transmittal Letter at 3.

³ 16 U.S.C. 839e (2012).

⁴ 18 CFR pt. 300 (2017).

⁵ These values are the totals of all of Bonneville's transmission revenues, inclusive of the transmission rates at issue in Docket No. EF17–4–000. See Bonneville August 7, 2017 Transmittal Letter at 2; *Bonneville Power Admin.*, 160 FERC ¶ 61,113 (2017) (approving on an interim basis the transmission rates associated with the Southern Intertie).

probability of making all payments to the United States Treasury in full and on time for each year of the rate period.⁶

II. Notice of Filing

3. Notice of Bonneville's July 31, 2017 filing was published in the **Federal Register**, 82 FR 37,445 (2017),⁷ with protests and interventions due on or before August 30, 2017. Timely motions to intervene were filed by Pacific Northwest Generating Cooperative, Powerex Corporation, Turlock Irrigation District, Avista Corporation, Sacramento Municipal Utility District, Northwest Requirements Utilities, Industrial Customers of Northwest Utilities, NorthWestern Corporation, Western Public Agencies Group, M–S–R Public Power Agency, Snohomish County Public Utility District No. 1, Public Power Council, Puget Sound Energy Inc., Idaho Power Company, and Avangrid Renewables LLC. Renewable Northwest filed a timely motion to intervene and comments. Sierra Club and Montana Environmental Information Center (Sierra Club/MEIC) filed a timely motion to intervene and protest. On September 14, 2017, Bonneville filed a request for leave to answer and answer to Sierra Club/MEIC's protest and Renewable Northwest's comments.

4. Sierra Club/MEIC argues that eliminating Bonneville's IM Rate,⁸ in particular, is necessary to meet Bonneville's statutory mandate to encourage the widest possible diversified use of electric power at the lowest possible rates to consumers, consistent with sound business principles.⁹ Sierra Club/MEIC asserts that the IM Rate is the primary impediment to renewable resource development in Montana.¹⁰ Sierra Club/MEIC explains that Bonneville effectively charges two rates for Montana producers seeking to use the Eastern Intertie—the IM Rate and the Network Rate—which inequitably allocates transmission costs and has impeded subscription of the Eastern Intertie.¹¹ According to Sierra Club/

⁶ Bonneville July 31, 2017 Transmittal Letter at 5, 8.

⁷ Notices of Bonneville's errata filings were published in the **Federal Register**, 82 FR 41,014 (2017) and 82 FR 40,151 (2017). The notices of the errata filings retained the August 30, 2017 date by which protests or interventions were due.

⁸ The IM Rate is the rate that Bonneville charges for the available 200 megawatts (MW) of capacity on the Eastern Intertie, which is the portion of the Montana Intertie between the Townsend and Garrison substations in western Montana that Bonneville built and continues to operate.
