SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled “ANDAs for Certain Highly Purified Synthetic Peptide Drug Products That Refer to Listed Drugs of rDNA Origin.” In general, for FDA to approve an ANDA submitted under section 505(j) of the FD&C Act, an ANDA applicant must demonstrate, among other things, that the proposed generic drug has the “same” active ingredient(s) as and is bioequivalent to its reference listed drug, and that the methods used in, and the facilities and controls used for, the manufacture, processing, and packing of the proposed generic drug are adequate to assure and preserve its identity, strength, quality, and purity (sections 505(j)(2)(A) and (4) (21 U.S.C. 355(j)(2)(A) and (4)) of the FD&C Act). If a person is seeking approval of a synthetic peptide drug product (specifically glucagon, liraglutide, nesiritide, teriparatide, or teduglutide) and intends to submit an application that refers to a previously approved peptide drug product of rDNA origin, if the active ingredient in the proposed synthetic peptide drug product can be shown to be the same as the active ingredient in the peptide drug product of rDNA origin, whether the application should be submitted as an ANDA under section 505(j) of the FD&C Act or as a new drug application under section 505(b) of the FD&C Act will depend largely on the impurity profile for the synthetic peptide drug product as compared to the impurity profile for the peptide drug product of rDNA origin. Differences in impurities, particularly peptide-related impurities, may affect the safety or effectiveness of a peptide drug product. This draft guidance is intended to assist potential applicants in determining when an application for a synthetic peptide drug product that refers to a previously approved peptide drug product of rDNA origin should be submitted as an ANDA rather than an NDA.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on the submission of ANDAs for certain highly purified synthetic peptide drug products that refer to listed drugs of rDNA origin. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the

requirements of the applicable statutes and regulations. This draft guidance is not subject to Executive Order 12866.

II. The Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collection of information required under 21 CFR part 314 for the submission of NDAs and ANDAs is approved under OMB control number 0910–0001, and the submission of controlled correspondence pertaining to ANDAs is approved under OMB control number 0910–0797.
