Abstract: The primary objective of the National Agricultural Statistics Service is to prepare and issue State and national estimates of crop and livestock production, disposition, and prices. The Agricultural Labor Survey provides quarterly statistics on the number of agricultural workers, hours worked, and wage rates. Number of workers and hours worked are used to estimate agricultural productivity; wage rates are used in the administration of the H-2A Program and for setting Adverse Effect Wage Rates. Following these two surveys NASS will re-contact approximately 500 operators to conduct quality control surveys to help insure the quality of the data

collected. NASS also plans to conduct some cognitive testing during this renewal period. The public reporting burden for this information collection is estimated to average 5 minutes for the quality control surveys and 30 minutes per response in April and October.
