

Gasburg Creek Dike

Don Pedro dam spillway discharges into Gasburg Creek. Gasburg Creek dike is located near the downstream end of the spillway, and directs flows from Gasburg Creek into Twin Gulch where spillway discharges join the Tuolumne River approximately 1.5 miles downstream of the Don Pedro powerhouse. Gasburg Creek dike consists of an impervious earth and rockfill dam approximately 75 feet in height, with a slide-gate controlled 18-inch-diameter conduit. The top of Gasburg Creek dike is at elevation 725 feet msl.

Dikes A, B, and C

The project includes three small embankments—Dikes A, B, and C—constructed in low saddles on the reservoir rim with top elevations of 855 feet msl. Dike A is located between the

main dam and spillway. Dikes B and C are located east of the main dam.

Recreation Facilities

The project has three developed recreation areas, Fleming Meadows, Blue Oaks, and Moccasin Point. Primitive and semi-primitive lakeshore camping occurs on much of the rest of its shores. The project provides both floating and shoreline restrooms in addition to those at the developed recreation areas. Facilities also include hazard marking, regulatory buoy lines, and other open water-based features including houseboat marinas and a marked water-ski slalom course.
