

the Single Channel Ground and Airborne Radio System (SINCGARS) family. SINCGARS is a tactical radio providing secure jam-resistant voice and data communications of command, control, targeting, and technical information for the Terminal High Altitude Air Defense (THAAD) system. The spread-spectrum frequency hopping Electronic Counter-Counter Measures (ECCM) technology resident in the radio is sensitive but UNCLASSIFIED. While sensitive, the frequency-hopping algorithms used to generate the ECCM waveform are unique to the country of ownership and cannot be manipulated by potential adversaries for use or interference with other countries possessing SINCGARS technology. Should a potential adversary come into possession of one of these radios, they would have the potential to intercept operational command, control, and targeting information. This potential problem is mitigated by the fact that the customer can secure information passed over the radio network using a commercial grade security capability equivalent to an Advanced Encryption Standard (AES) 256-bit encryption system whose keys are controlled by the customer country.

5. As with the SINCGARS family of radios, the AN/PRC-117 is a tactical radio providing ECCM jam-resistant secure communications for exchange of command, control, and targeting information within the THAAD system tactical radio network. ECCM capabilities are sensitive but UNCLASSIFIED and algorithms for these jam-resistant waveforms are unique to the customer country. Unlike the SINCGARS radios, the AN/PRC-117 uses Type 1 encryption. When loaded with U.S. crypto keys, the system is then CLASSIFIED up to SECRET. Should a potential adversary come into possession of one of these radios, the customer country can quickly remotely rekey remaining radios, preventing potential adversaries from understanding received command, control, and targeting information.

6. The Defense Advanced Global Positioning System (GPS) Receiver (DAGR) is a handheld GPS location device with map background displaying the user's location. Unlike commercial grade GPS receivers capable of receiving Standard Positioning Signals (SPS) from GPS satellites, the DAGR is capable of receiving Precise Positioning Signals (PPS). PPS satellite signals provide significantly more accurate location data than do SPS signals. This capability within DAGRs is possible due to the Selective Availability Anti-Spoofing Module (SAASM). The SAASM is an

encrypted device permitting both receipt of PPS signals and the benefit of preventing potential adversaries from spoofing the system to display incorrect location information. The SAASM capability within the DAGR is sensitive but UNCLASSIFIED. The SAASM capabilities are sensitive due to the system's ability to access restricted PPS GPS satellite signals and to prevent spoofing. While sensitive, the ability of potential adversaries to exploit the system is limited.

7. The same SAASM capabilities resident in the DAGR are also resident in the THAAD GPS timing system. The THAAD system requires highly precise timing hacks in order accurately track and engage targets. The PPS signals generated by GPS satellites provide this precise timing information. The SAASM device resident in the timing system permits receipt of this precise PPS timing data. The SAASM is an encrypted device permitting both receipt of PPS signals and the benefit of preventing potential adversaries from spoofing the system to display incorrect data. The SAASM capability within the timing system is sensitive but UNCLASSIFIED.

8. If a technologically advanced adversary were to obtain knowledge of specific hardware, the information could be used to develop countermeasures which might reduce weapons system effectiveness or be used in the development of a system with similar or advanced capabilities.

9. A determination has been made that Saudi Arabia can provide substantially the same degree of protection for sensitive technology being released as the U.S. Government. This proposed sustainment program is necessary to the furtherance of the U.S. foreign policy and national security objectives outlined in the policy justification.

10. All defense articles and services listed on this transmittal are authorized for release and export to the Kingdom of Saudi Arabia.

Office of the Secretary

Advisory Panel on Streamlining and Codifying Acquisition Regulations

AGENCY: Office of the Under Secretary of Defense (Acquisition, Technology, and Logistics), DoD.

ACTION: Notice of Advisory Panel.

SUMMARY: The Department of Defense is publishing this notice to encourage feedback for the Section 809 Advisory Panel on Streamlining and Codifying Acquisition Regulations (hereafter "the Panel"). The Panel meets on a monthly basis and will provide a final report to the Secretary of Defense and Congress in 2019. The agendas, meeting times, and contact information are posted on the Panel Web site: <http://www.section809panel.org>. Public feedback can be submitted in the "Contact Us" section of the Web site as either general comments or specific recommendations.

FOR FURTHER INFORMATION CONTACT: Shayne L. Martin, Section 809 Panel, 1400 Key Blvd., Suite 210, Arlington, VA 22209, email: shayne.martin@dau.mil, phone: 703-571-2989.

SUPPLEMENTARY INFORMATION: Section 809 of the National Defense Authorization Act for Fiscal Year 2016 (Pub. L. 114-92) required the Secretary of Defense to establish "an advisory panel on streamlining acquisition regulations." The Panel was seated on August 12, 2016. By Statute, the Panel is exempt from the Federal Advisory Committee Act (5 U.S.C. Appendix). Public information, including opportunities for input, is posted and periodically updated at <http://www.section809panel.org>.

Dated: October 18, 2017.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Notice of Intent To Grant Exclusive Patent License; Taoglas USA, Inc.

AGENCY: Department of the Navy, DOD.

ACTION: Notice.

SUMMARY: The Department of the Navy
 hereby gives notice of its intent to grant
 an exclusive license to Taoglas USA,
 Inc. of San Diego, CA. The proposed
 license is a revocable, nonassignable,
 exclusive license to practice the
 invention embodied in U.S. Pat. App.
 Ser. No. 15/267,219: BROADBAND
 CIRCULARLY POLARIZED ANTENNA
 in the fields of use of automotive and
 Internet of Things (IoT) throughout the
 United States, the District of Columbia,
 the Commonwealth of Puerto Rico, and
 all other United States territories and
 possessions. The Secretary of the Navy
 has an ownership interest in this
 invention.

DATES: Anyone wishing to object to the
 grant of this license has fifteen (15) days
 from the date of this notice to file
 written objections along with
 supporting evidence, if any.

ADDRESSES: Written objections are to be
 filed with the Naval Undersea Warfare

DEPARTMENT OF ENERGY

[FE Docket No. 17-105-LNG]

Fourchon LNG LLC; Application for Long-Term, Multi-Contract Authorization To Export Liquefied Natural Gas to Non-Free Trade Agreement Nations

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of application.

SUMMARY: The Office of Fossil Energy (DOE) (FE) of the Department of Energy (DOE) gives notice of receipt of an application (Application), filed on August 17, 2017, by Fourchon LNG LLC (Fourchon LNG), requesting long-term, multi-contract authorization to export domestically produced liquefied natural gas (LNG) in a volume equivalent to 260 billion cubic feet (Bcf) per year. Fourchon LNG seeks authorization to export this LNG from a proposed natural gas liquefaction facility to be located on Port Fourchon at Belle Pass in Lafourche Parish, Louisiana (Facility). Fourchon LNG proposes to site, construct, own, and operate this Facility with a peak capacity of approximately five million tonnes per annum (mtpa). The Facility will be developed in phases, with the first phase expected to have a capacity of two mtpa, to be followed by the remaining LNG trains as demand develops, each of which will have a capacity of 0.5 mtpa. Fourchon LNG requests authorization to export this LNG to countries with which trade is not prohibited by U.S. law or policy, including both countries with which the United States has entered into a free trade agreement (FTA) requiring national treatment for trade in natural gas (FTA countries) and all other countries (non-FTA countries). Fourchon LNG requests the non-FTA authorization for a term of 20 years, to commence on the date of first export following the commencement of operations or seven years from the date of a final order granting export authorization, whichever is first. Fourchon LNG is requesting this authorization on its own behalf and as agent for other entities who hold title to the natural gas at the time of export. Fourchon LNG filed the Application under section 3 of the Natural Gas Act (NGA). Additional details can be found in Fourchon LNG's Application, posted on the DOE/FE Web site at <https://www.energy.gov/fe/downloads/fourchon-lng-llc-fe-dkt-no-17-105-lng>. Protests, motions to intervene, notices of intervention, and written comments are invited.
