

DEPARTMENT OF TRANSPORTATION**National Highway Traffic Safety Administration**

[Docket No. NHTSA–2017–0053]

Highway Safety Programs; Conforming Products List of Evidential Breath Alcohol Measurement Devices

AGENCY: National Highway Traffic Safety Administration, Department of Transportation.

ACTION: Notice.

SUMMARY: This notice updates the Conforming Products List (CPL) published in the **Federal Register** on June 14, 2012 (77 FR 35747) for instruments that conform to the Model Specifications for Evidential Breath Alcohol Measurement Devices dated, September 17, 1993 (58 FR 48705). This notice also informs the public that all future updates to the CPL will be posted on NHTSA's Web site.

DATES: Applicable November 2, 2017.

FOR FURTHER INFORMATION CONTACT:

For technical issues: Dr. Randolph Atkins, Behavioral Research Division, NPD–310, National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590; Telephone: (202) 366–5597.

For legal issues: Megan Brown, Office of Chief Counsel, NCC–300, National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590; Telephone: (202) 366–1834.

SUPPLEMENTARY INFORMATION: On November 5, 1973, the National Highway Traffic Safety Administration (NHTSA) published the Standards for Devices to Measure Breath Alcohol (38 FR 30459). A Qualified Products List of Evidential Breath Measurement Devices comprised of instruments that met this standard was first issued on November 21, 1974 (39 FR 41399).

On December 14, 1984 (49 FR 48854), NHTSA converted this standard to Model Specifications for Evidential Breath Testing Devices (Model Specifications), and published a Conforming Products List (CPL) of instruments that were found to conform to the Model Specifications as Appendix D to that notice. Those instruments are identified on the CPL with an asterisk.

On September 17, 1993, NHTSA published a notice to amend the Model Specifications (58 FR 48705) and to update the CPL. That notice changed the alcohol concentration levels at which instruments are evaluated, from 0.000, 0.050, 0.101, and 0.151 BAC, to 0.000,

0.020, 0.040, 0.080, and 0.160 BAC, respectively. It also included a test for the presence of acetone and an expanded definition of alcohol to include other low molecular weight alcohols, *e.g.*, methyl or isopropyl. Since that time, the CPL has been annotated to indicate which instruments have been determined to meet the Model Specifications published in 1984, and which have been determined to meet the Model Specifications, as revised and published in 1993. Thereafter, NHTSA has periodically updated the CPL with those breath instruments found to conform to the Model Specifications. The most recent update to the CPL was published June 14, 2012 (77 FR 35747).

NHTSA published the 1974 Qualified Products List, the 1984 CPL and all succeeding updates to the CPL in the **Federal Register**. Future updates of the CPL will be posted on the NHTSA Web site (<https://www.nhtsa.dot.gov/drunk-driving/alcohol-measurement-devices>) rather than to the **Federal Register**. Online publication will make it easier for users to access the most recent CPL and will allow NHTSA to make more timely updates to the CPL. NHTSA will continue to publish any amendments to the Model Specifications in the **Federal Register**.

The CPL published today adds twelve (12) new instruments that have been evaluated and found to conform to the Model Specifications, as amended on September 17, 1993 for mobile and non-mobile use. One instrument is distributed by two different companies, so it has been listed twice. One manufacturer changed their legal name. One manufacturer added a new product option for USB and Ethernet connectivity. One manufacturer added a Bluetooth keyboard accessory to two (2) devices and a calibration accessory for seven (7) of its devices. These devices were found to conform with or without the accessories. Another seven (7) instruments are now being listed under a different distributor/manufacturer and those devices will be cross-referenced for legacy purposes. In alphabetical order by company, the new devices are:

(1) The “AlcoMate TS600” distributed by AK GlobalTech Corporation, Palisades Park, New Jersey. This device will be known as the Alcoscan ALP–1 outside of the U.S. The AlcoMate TS600 is a hand-held device with an electrochemical (EC) fuel cell sensor. This device is powered by internal batteries and is intended for mobile or stationary operations.

(2) The “Intoxilyzer 500” manufactured by CMI, Inc., Owensboro, Kentucky. This instrument is currently

listed on the CPL for Alcohol Screening Devices and will be removed when that CPL is updated. Improvements to the device's sampling system allow it to conform as an EBT. It is a hand-held instrument intended for use in mobile or stationary operations. It uses a fuel cell sensor and is powered by an internal battery. The Intoxilyzer 500 is also distributed as the Lion Alcolmeter 500 by Lion Laboratories outside the U.S., so it has been listed twice on the CPL, once under each of its distributors/manufacturers.

(3) The “Intoxilyzer 9000” manufactured by CMI, Inc., Owensboro, Kentucky. This is a bench-top device that is intended for use in mobile or stationary operations. This device uses an infrared (IR) sensor to measure ethanol concentration. The Intoxilyzer 9000 can be powered by either 110 volts alternate current (AC) or 12 volts direct current (DC).

(4) The “Alcotest 3820” manufactured by Draeger, Inc., Irving, Texas. The Alcotest 3820 is a hand-held device that uses an electrochemical (EC) fuel cell sensor to measure ethanol concentration. This instrument is powered by internal batteries and is intended for use in stationary or mobile operations.

(5) The “Alcotest 5510” manufactured by Draeger, Inc., Irving, Texas. The Alcotest 5510 is a hand-held device that uses an electrochemical (EC) fuel cell sensor to measure ethanol. This device is powered by internal batteries and is intended for use in mobile or stationary operations.

(6) The “Alcotest 5820” manufactured by Draeger, Inc., Irving, Texas. The Alcotest 5820 is a hand-held device that uses an electrochemical (EC) fuel cell sensor to measure ethanol. This device is powered by internal batteries and is intended for use in mobile or stationary operations.

(7) The “Alcotest 6820” manufactured by Draeger, Inc., Irving, Texas. The Alcotest 6820 is a hand-held device that uses an electrochemical (EC) fuel cell sensor to measure ethanol. This device is powered by internal batteries and is intended for use in mobile or stationary operations.

(8) The “AlcoQuant 6020 Plus” manufactured by EnviteC, Wismar, Germany and distributed by Honeywell GmbH, Fond du Lac, Wisconsin. The AlcoQuant 6020 Plus is a hand-held device with a fuel cell sensor. This device is powered by internal batteries and is intended for use in mobile and stationary operations.

(9) The Alco-Sensor FST manufactured by Intoximeters, Inc., Saint Louis, Missouri. The Alco-Sensor

FST is a hand-held Evidential Breath Tester that uses an electrochemical (EC) fuel cell sensor to measure ethanol concentration. This instrument is powered by internal batteries and is intended for use in stationary or mobile operations.

(10) The Intox DMT Dual Sensor manufactured by Intoximeters, Inc., Saint Louis, Missouri. The Intox DMT Dual Sensor is a bench-top Evidential Breath Tester that is intended for use in stationary or mobile operations. This device uses both an infrared (IR) sensor and an electrochemical (EC) fuel cell sensor. The Intox DMT Dual Sensor can be powered by either 110 volts AC or 12 volts DC.

(11) The "Intox EC/IR II.t" manufactured by Intoximeters, Inc, Saint Louis, Missouri. This is a bench-top device intended for use in mobile or stationary operations. This device uses both an electrochemical (EC) fuel cell sensor and an infrared (IR) sensor to measure ethanol concentrations. The Intox EC/IR II.t can be powered by either 110 volts AC or 12 volts DC.

(12) The "FC10Plus" manufactured by Lifeloc Technologies, Inc., Wheat Ridge, Colorado. This is a hand-held device that is intended for use in mobile or stationary operations. This device uses a fuel cell sensor and is powered by internal batteries.

This update indicates that two (2) devices (the Phoenix 6.0 and the FC20, manufactured by Lifeloc Technologies, Inc., Wheat Ridge, Colorado) come with Bluetooth keyboard support and five additional fields that users can use to enter additional information. With these features, these devices will be listed on the CPL as the "Phoenix 6.0BT" and the "FC20BT". This update indicates also that seven (7) devices manufactured by Lifeloc come with the EASYCAL calibration accessory. Those devices include the FC10, FC10Plus, FC20, FC20BT, EV30, Phoenix 6.0 and the Phoenix 6.0BT. The CPL specifies that each of these devices conforms to the model specifications "w/or without the EASYCAL accessory."

Intoximeters, Inc., Saint Louis, Missouri acquired the breath alcohol

testing business of National Patent Analytical Systems, Inc. (NPAS). Since there have been no changes to the devices other than ownership and a device name change, all six devices previously listed under NPAS (BAC DataMaster (with or without the Delta-1 accessory), BAC Verifier DataMaster (w/or without the Delta-1 accessory), DataMaster cdm (w/or without the Delta-1 accessory), DataMaster DMT w/ Fuel Cell option, DataMaster DMT w/ Rev A Fuel Cell option, and DataMaster DMT) will now be listed under both Intoximeters and NPAS. The NPAS DataMaster DMT will now be known as the Intoximeters Intox DMT. Accordingly, this device will be listed under Intoximeters under both names.

The CPL has been updated to reflect that Draeger Safety Diagnostics, Inc. will begin operating under the name Draeger, Inc. effective July 1, 2017 in order to align all sales and service operations for Draeger in the United States.

In accordance with the foregoing, the CPL is updated, as set forth below.

CONFORMING PRODUCTS LIST OF EVIDENTIAL BREATH MEASUREMENT DEVICES

* Instruments marked with an asterisk (*) meet the Model Specifications detailed in 49 FR 48854 (December 14, 1984) (*i.e.*, instruments tested at 0.000, 0.050, 0.101, and 0.151 BAC). Instruments not marked with an asterisk meet the Model Specifications detailed in 58 FR 48705 (September 17, 1993), and were tested at BACs = 0.000, 0.020, 0.040, 0.080, and 0.160. All instruments that meet the Model Specifications currently in effect (dated September 17, 1993) also meet the Model Specifications for Screening Devices to Measure Alcohol in Bodily Fluids.

Authority: 44 U.S.C. Section 3506(c)(2)(A).

Issued in Washington, DC, on October 30, 2017.

Jeff Michael,

Associate Administrator, Research and Program Development.

BILLING CODE 4910-59-P

DEPARTMENT OF THE TREASURY

Community Development Financial Institutions Fund

Funding Opportunity Title: Notice of Guarantee Availability (NOGA) Inviting Qualified Issuer Applications and Guarantee Applications for the Community Development Financial Institutions (CDFI) Bond Guarantee Program

Announcement Type: Announcement of opportunity to submit Qualified Issuer Applications and Guarantee Applications.

Catalog of Federal Domestic Assistance (CFDA) Number: 21.011.

Key Dates: Qualified Issuer Applications and Guarantee Applications may be submitted to the CDFI Fund starting on the date of publication of this NOGA. In order to be considered for the issuance of a Guarantee in FY 2018, Qualified Issuer Applications must be submitted by 11:59 p.m. Eastern Standard Time (EST) on January 9, 2018 and Guarantee Applications must be submitted by 11:59 p.m. EST on January 23, 2018. If applicable, CDFI Certification Applications must be received by the CDFI Fund by 11:59 p.m. EST on November 30, 2017. Under FY 2018 authority, which is contingent upon

Congressional authorization, Bond Documents and Bond Loan documents must be executed, and Guarantees will be provided, in the order in which Guarantee Applications are approved or by such other criteria that the CDFI Fund may establish, in its sole discretion, and in any event by September 30, 2018.

Executive Summary: This NOGA is published in connection with the CDFI Bond Guarantee Program, administered by the Community Development Financial Institutions Fund (CDFI Fund), the U.S. Department of the Treasury (Treasury). Through this NOGA, the CDFI Fund announces the availability of \$500 million of Guarantee Authority in FY 2018, contingent upon Congressional authorization. This NOGA explains application submission and evaluation requirements and processes, and provides agency contacts and information on CDFI Bond Guarantee Program outreach. Parties interested in being approved for a Guarantee under the CDFI Bond Guarantee Program must submit Qualified Issuer Applications and Guarantee Applications for consideration in accordance with this NOGA.

Capitalized terms used in this NOGA and not defined elsewhere are defined in the CDFI Bond Guarantee Program regulations (12 CFR 1808.102) and the CDFI Program regulations (12 CFR 1805.104).

I. Guarantee Opportunity Description

A. Authority. The CDFI Bond Guarantee Program was authorized by the Small Business Jobs Act of 2010 (Pub. L. 111-240; 12 U.S.C. 4713a) (the Act). Section 1134 of the Act amended the Riegle Community Development and

Regulatory Improvement Act of 1994 (12 U.S.C. 4701, *et seq.*) to provide authority to the Secretary of the Treasury (Secretary) to establish and administer the CDFI Bond Guarantee Program.

B. Bond Issue size; Amount of Guarantee authority. In FY 2018, the Secretary may guarantee Bond Issues having a minimum Guarantee of \$100 million each, up to an aggregate total of \$500 million, contingent upon Congressional authorization.

C. Program summary. The purpose of the CDFI Bond Guarantee Program is to support CDFI lending by providing Guarantees for Bonds issued for Eligible Community or Economic Development Purposes, as authorized by section 1134 and 1703 of the Act. The Secretary, as the Guarantor of the Bonds, will provide a 100 percent Guarantee for the repayment of the Verifiable Losses of Principal, Interest, and Call Premium of Bonds issued by Qualified Issuers. Qualified Issuers, approved by the CDFI Fund, will issue Bonds that will be purchased by the Federal Financing Bank. The Qualified Issuer will use 100 percent of Bond Proceeds to provide Bond Loans to Eligible CDFIs, which will use Bond Loan proceeds for Eligible Community and Economic Development Purposes, including providing Secondary Loans to Secondary Borrowers.

D. Review of Guarantee Applications, in general.

1. Qualified Issuer Applications submitted with Guarantee Applications will have priority for review over Qualified Issuer Applications submitted without Guarantee Applications. With the exception of the aforementioned prioritized review, all Qualified Issuer Applications and Guarantee
