A. Purpose

The information relative to the place of performance and owner of plant or facility, if other than the prospective contractor, is a basic requirement when contracting for supplies or services (including construction). A prospective contractor must affirmatively demonstrate its responsibility. Hence, the Government must be apprised of this information prior to award. The contracting officer must know the place of performance and the owner of the plant or facility to (1) determine bidder responsibility; (2) determine price reasonableness; (3) conduct plant or source inspections; and (4) determine whether the prospective contractor is a manufacturer or a regular dealer.

The information is used to determine the prospective contractor’s eligibility for awards and to assure proper preparation of the contract. Prospective contractors are only required to submit place of performance information on an exceptional basis; that is, whenever the place of performance for a specific solicitation is different from the address of the prospective contractor as indicated in the proposal.

B. Annual Reporting Burden

Time required to read, prepare, and record information is estimated at 2.73 minutes per completion. The Federal Procurement Data System (FPDS) shows that for fiscal year 2016, there were 1,960,218 solicitations that would have contained the two provisions (including contracts and orders, excluding modifications) for manufacturing in the United States. The 1,960,218 actions will be used as the new basis for total annual responses.

Respondents: 16,754.

Responses per Respondent: 117.

Total Responses: 1,960,218.

Hours per Response: .0455.

Total Burden Hours: 89,190.

Affected Public: Businesses or other for-profit and not-for-profit.

Respondent’s Obligation: Required to obtain or retain benefits.

Type of Request: Revision of a currently approved collection.

Reporting Frequency: On occasion.

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on

valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Obtaining Copies of Proposals:

Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street, NW., Washington, DC 20405 telephone 202–501–4755.
