

Serial Number PCT/US2013/050688, filed 07/16/2013; HHS Reference No. E-162-2013/0-US-03, United States Patent Application Serial Number 13/943,430, filed 07/16/2013; HHS Reference No. E-162-2013/0-EP-04, European Patent Application Serial Number 13819718.1, filed 02/05/2015; and HHS Reference No. E-162-2013/0-JP-05, Japanese Patent Application Serial Number 2015-523183, filed 01/08/2015. All rights in these inventions have been assigned to the Government of the United States of America.

The prospective exclusive patent commercialization license territory may be worldwide and the field of use may be limited to: "Use of the licensed patent rights for the development, manufacture, and sale of a lateral flow device for detection of antineoplastic drugs from surfaces".

Many types of cancers are treated with antineoplastic drugs, also known as anti-cancer drugs or chemotherapy. Exposure of healthcare workers to these hazardous drugs from contaminated surfaces may cause acute and long-term effects. Approximately eight (8) million United States healthcare workers are potentially exposed to these hazardous drugs. Although there are potential therapeutic benefits of hazardous drugs that outweigh the risks of side effects for ill patients, healthcare workers are exposed to the risk with the same side effects with no therapeutic benefit. Occupational exposures to hazardous drugs can lead to skin rashes and major reproductive effects, which include increased fetal loss, congenital malformations, low birth weight, congenital abnormalities, and infertility. The risk of cancer is also increased after exposure to these drugs.

This invention, developed within the National Institute for Occupational Safety and Health at the Centers for Disease Control and Prevention, describes a lateral flow assay-based antineoplastic drug detection method that utilizes antibodies specific for individual drugs. It uses detectors for the assessment of drug residues on surfaces, which can be incorporated into small, portable drug detection devices that allow healthcare workers to sample surfaces in near real time, avoiding the need to take samples back to the laboratory to be tested.

This notice is made in accordance with 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive patent commercialization license will be royalty bearing and may be granted unless within fifteen (15) days from the date of this published notice, the National Institute of Allergy and Infectious Diseases receives written

evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

Complete applications for a license in the prospective field of use that are timely filed in response to this notice will be treated as objections to the grant of the contemplated exclusive patent commercialization license. Comments and objections submitted in response to this notice will not be made available for public inspection and, to the extent permitted by law, will not be released under the *Freedom of Information Act*, 5 U.S.C. 552.

Dated: November 9, 2017.

Suzanne Frisbie,

Deputy Director, Technology Transfer and Intellectual Property Office, National Institute of Allergy and Infectious Diseases.

National Eye Institute; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the Board of Scientific Counselors, National Eye Institute.

The meeting will be closed to the public as indicated below in accordance with the provisions set forth in section 552b(c)(6), Title 5 U.S.C., as amended for the review, discussion, and evaluation of individual grant applications conducted by the NATIONAL EYE INSTITUTE, including consideration of personnel qualifications and performance, and the competence of individual investigators, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Board of Scientific Counselors, National Eye Institute.

Date: December 3-5, 2017.

Time: 6:00 p.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Building 31, Conference Room 6C6, 31 Center Drive, Bethesda, MD 20892.

Contact Person: Sheldon S. Miller, Ph.D., Scientific Director, National Institutes of Health, National Eye Institute, Bethesda, MD 20892, (301) 451-6763.

Information is also available on the Institute's/Center's home page: www.nei.nih.gov, where an agenda and any additional information for the meeting will be posted when available.

(Catalogue of Federal Domestic Assistance Program Nos. 93.867, Vision Research, National Institutes of Health, HHS)

Dated: November 9, 2017.

Natasha M. Copeland,

Program Analyst, Office of Federal Advisory Committee Policy.
