SUPPLEMENTARY INFORMATION:

Title: Timber Sale Contract Operations and Administration.

OMB Number: 0596-0225.

Expiration Date of Approval: May 31, 2018.

Type of Request: Renewal without Change.

Abstract: Forest Service contracts for the sale of timber and other forest products are bilateral contracts in which both contracting parties are bound to fulfill obligations reciprocally. By their nature, bilateral contracts require both parties to routinely share information and enter into agreements pertaining to operations and performance. Some information collected under Forest Service contracts is required by laws, regulations, and/or timber sale policies. Each contract specifies information the contractor will be required to provide, including the timing and frequency of the information collection.

The type and amount of information collected varies depending on the size, complexity, and length of each contract, and external factors such as weather and market conditions. The information collected includes plans, requests, agreements, and notices necessary for operations under the terms of the contracts. Forest Service officers collect the information from contractors who may be individuals, private sector businesses, or other government entities. The information is submitted in a variety of formats including Forest Service forms, Government Standard and/or Common Forms, forms developed by individual contractors, charts, maps, email messages, facsimiles, and letters. Also, to assist small contractors and lessen their burden, individual Contracting Officers may provide optional forms for some of the information collected.

Depending on the purpose of the specific information collection, the information may be submitted by electronic mail, facsimile, conventional mail, or hand delivery. The information is needed by the Agency for a variety of uses associated with the operations and administration of contracts for the sale of timber and other forest products, in order to: (1) Plan and schedule contract administration workloads, (2) plan and

schedule the delivery of government furnished materials needed by contractors, (3) assure the safety of the public in the vicinity of contract work, (4) identify contractor resources that may be used in emergency fire-fighting situations, (5) determine contractor eligibility for additional contract time, (6) determine contractor eligibility for re-determining contract rates, (7) monitor compliance with domestic processing requirements, (8) monitor compliance with Small Business Administration requirements, (9) process agreements and modifications, (10) inspect and accept work and (11) properly process payment bonds.

SUPPLEMENTARY INFORMATION:

Title: Qualified Products Lists for Fire Chemicals for Wildland Fire Management.

OMB Number: 0596-0182.

Expiration Date of Approval: April 30, 2018.

Type of Request: Extension with no revision.

Abstract: The Forest Service and cooperating wildland firefighting agencies need adequate types and quantities of qualified fire chemical products available to accomplish fire management activities as safely and effectively as possible. To accomplish

this objective, the Agency evaluates and pre-approves commercial wildland firefighting chemicals. The Agency is required to submit the formulations to the U.S. Fish and Wildlife Service and NOAA Fisheries during the evaluation process. All products must meet the requirements of specifications identified and maintained by the Wildland Fire Chemical Systems (WFCS) staff at the National Technology & Development Program (Missoula). After a product evaluation has been completed successfully, the product is added to the Qualified Products List (QPL) for the appropriate product type. All Federal procurements of wildland fire chemicals are made from these lists.

To initiate an evaluation, product manufacturers (or authorized suppliers) enter into an agreement with the Forest Service and pay all costs associated with the submission and evaluation of the product. Once the agreement is in place and funds are deposited to cover the associated costs, the manufacturer submits the following information to WFCS:

1. List of the specific ingredients and quantity used to prepare the product;
2. Identification of a specific company as the source of supply for each ingredient;
3. Copies of the Material Safety Data Sheet (MSDS) for the product and for each ingredient used to prepare the product (from the company that supplies that chemical); and
4. Specific mixing requirements and performance information.

Review of the submitted information assures that the product does not contain ingredients meeting the criteria for Chemicals of Concern. Chemicals of Concern are defined as chemicals appearing on one or more of the following lists:

- Agency list of unacceptable ingredients;
- National Toxicology Program (NTP) Annual Report on Carcinogens;
- International Agency for Research on Cancer (IARC) Monographs for Potential Carcinogen;
- Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) List of Extremely Hazardous Substances and Their Threshold Planning Quantities;
- Resources Conservation and Recovery Act (RCRA), Acutely Hazardous and Toxic Wastes; and
- Emergency Planning and Community Right to Know (EPCRA), Toxic Release Inventory.

A risk assessment, performed at the manufacturer expense, is required. The risk assessment, performed by a third party selected by the Agency, assesses
