

various reasons this has occurred, including being considered snack-type foods, lacking a standard of identity, or because the volume of food required to meet the minimum serving size would be unreasonably large. For example, foods such as popcorn, vegetable chips (does not include chips made from grain such as tortilla chips), bacon, and tempeh are currently not creditable for the aforementioned reasons. A list of various foods that do not currently credit in the Child Nutrition Programs is available in FNS' *Food Buying Guide for Child Nutrition Programs* under "Other Foods" (see <https://fns.usda.gov/sites/default/files/tn/fbg-section5-other.pdf>). Comments on any foods currently not creditable in the Child Nutrition Programs are welcome, using the following questions as a guide.

20. Are Child Nutrition Program operators currently offering any of these foods as an extra item that does not contribute to the Child Nutrition Programs' meal patterns? If so, which ones?

21. Should FNS allow any of these foods to contribute to the Child Nutrition Programs' meal patterns? Why or why not? If so, which ones?

22. If any of these foods are allowed to contribute to the Child Nutrition Programs' meal patterns, how should they be credited? Be as specific as possible, such as the volume or weight needed, or a specific nutrient content.

22a. Is there an ingredient, processing method, or nutrient standard (e.g., sodium content) that should qualify or disqualify any of these foods?

23. If any of these foods are allowed to contribute to the Child Nutrition Programs' meal patterns, would Child Nutrition Program operators incorporate them into menus to meet the Child Nutrition Programs' meal patterns? Why or why not?

23a. If yes, how would they be served (e.g., as part of a reimbursable snack)?

24. If any of these foods are allowed to contribute to the Child Nutrition Programs' meal patterns, how would this impact the Child Nutrition Programs, including its participants and operators, as well as food manufacturers? What are the potential benefits and negative impacts?

25. Are there additional products not mentioned in this request for information that are currently not creditable, but you would wish to provide comments on? Please be as specific as possible.

FNS appreciates your thoughtful and responsive comments. FNS welcomes comments from all interested stakeholders and will consider all of them carefully. Your comments are

essential to enabling FNS to provide first rate customer service to those we serve.

Foreign-Trade Zones Board

[B-77-2017]

Foreign-Trade Zone (FTZ) 158— Jackson, Mississippi; Notification of Proposed Production Activity; Traxys Cometals Processing, Inc. (Manganese and Aluminum Alloying Agents); Burnsville, Mississippi

Traxys Cometals Processing, Inc. (Traxys Cometals), submitted a notification of proposed production activity to the FTZ Board for its facility in Burnsville, Mississippi. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on November 27, 2017.

The applicant indicates that it will be submitting a separate application for FTZ designation at the Traxys Cometals facility under FTZ 158. The facility will be used to produce high-grade manganese and aluminum alloying agents to be supplied to steel and aluminum production plants. Pursuant to 15 CFR 400.14(b), FTZ activity would be limited to the specific foreign-status materials and components and specific finished products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt Traxys Cometals from customs duty payments on the foreign-status components used in export production. On its domestic sales, for the foreign-status materials/components noted below, Traxys Cometals would be able to choose the duty rates during customs entry procedures that apply to carbon-free manganese briquettes, low-carbon manganese briquettes, manganese powder, MnAl (manganese/aluminum) briquettes, and CrAl (chromium/aluminum) briquettes (duty rate ranges from 1.4% to 14%). Traxys Cometals would be able to avoid duty on foreign-status components which become scrap/waste. Customs duties also could possibly be deferred or reduced on foreign-status production equipment.

The components and materials sourced from abroad include electrolytic manganese flakes, chromium powder, and chromium waste (duty rate ranges from duty-free to 14%).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is January 23, 2018.

A copy of the notification will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230-0002, and in the "Reading Room" section of the Board's website, which is accessible via www.trade.gov/ftz.

For further information, contact Christopher Wedderburn at Chris.Wedderburn@trade.gov or (202) 482-1963.

Dated: December 11, 2017.

Andrew McGilvray,

Executive Secretary.
