II. Discussion

On November 7, 2017, the NRC solicited comments on its draft licensing guidance entitled "Yttrium-90 (Y-90) Microsphere Brachytherapy Sources and Devices TheraSphere® and SIR-Spheres® Licensing Guidance." This draft would be revision 10 to this licensing guidance. The licensing guidance for Y-90 microsphere brachytherapy was initially published in October 2002 and subsequently revised in 2004, 2007, 2008, 2011, 2012, and 2016. Following years of using the current licensing guidance, the NRC staff, stakeholders, and the Advisory Committee on the Medical Uses of Isotopes identified numerous issues that need to be addressed. A working group composed of Agreement State representatives and NRC staff was formed to address identified issues. This draft licensing guidance for Y-90 microsphere brachytherapy has been revised to update criteria for training and experience, medical event reporting, inventory requirement specifications, and waste disposal issues. The draft guidance provides new information regarding cremation and autopsy. The public comment period was originally scheduled to close on January 8, 2018. The NRC has decided to extend the public comment period on this document until February 8, 2018, to allow more time for members of the public to submit their comments.

Dated at Rockville, Maryland, this 27th day of December 2017.

For the Nuclear Regulatory Commission,
Kevin Williams,

Deputy Director, Division of Material Safety, State, Tribal and Rulemaking Programs, Office of Nuclear Material Safety and Safeguards.
