POLICY JUSTIFICATION

Japan—Standard Missile-3 (SM-3) Block IIA Missiles

The Government of Japan has requested a possible sale of four (4) Standard Missile-3 (SM-3) Block IIA missiles. Also included are four (4) MK 29 missile canisters, U.S. Government and contractor representatives' technical assistance, transportation, engineering and logistics support services, and other related elements of logistical and program support. The estimated total case value is \$133.3 million.

This proposed sale will contribute to the foreign policy and national security of the United States by improving the security of a major ally that has been, and continues to be, a force for political stability and economic progress in the Asia-Pacific region.

The proposed sale will provide Japan with an increased ballistic missile defense capability to assist in defending the Japanese homeland and U.S.

personnel stationed there. Japan will have no difficulty absorbing these additional munitions and support into the Japan Maritime Self Defense Force (JMSDF).

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors will be Raytheon Missile Systems, Tucson, AZ (SM-3); and BAE Systems, Minneapolis, MN (MK 29). There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require annual trips to Japan involving U.S. Government and contractor representatives for technical reviews, support, and oversight for approximately five years.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 17-69

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The proposed sale will involve the release of sensitive technology to the Government of Japan related to the Standard Missile-3 (SM-3) Block IIA missile. The ship- or ground-launched SM-3 Block IIA is the most recent iteration in the SM-3 family. It has two distinct new features: larger rocket motors that will allow it to defend broader areas from ballistic missile threats; and a larger kinetic warhead. The kinetic warhead has been enhanced, improving the search, discrimination, acquisition and tracking functions, to address emerging threats. Once enclosed in the canister, the SM-3 Block IIA missile is classified CONFIDENTIAL. The optics hardware and signal processor are classified SECRET.

2. If a technologically advanced adversary were to obtain knowledge of specific hardware, the information could be used to develop countermeasures which might reduce weapons system effectiveness or be used in the development of a system with similar or advanced capabilities.

3. A determination has been made that Japan can provide substantially the same degree of protection for sensitive technology being released as the U.S. Government. This proposed sustainability program is necessary to the furtherance of the U.S. foreign policy and national security objectives outlined in the policy justification.

4. All defense articles and services listed in this transmittal are authorized for release and export to the Government of Japan.
