SUPPLEMENTARY INFORMATION:

Title: "Right-of-Way Cost Estimation Processes; State of the Practice". Government agencies that acquire real property for a Federal-aid highway program typically consider the cost of many alternatives for a potential project. As a part of this consideration, estimates of the cost of right-of-way needed for potential highway alignments must be determined and documented. Agencies may use several different methods to determine the estimate and document these costs. The methods range from a process using only paper and pencil, all the way to a process utilizing Geographic Information System (GIS) mapping and electronic data capture methods. The electronic methods presumably include an electronic calculation method which tabulates and calculates total costs, area to be acquired, and the numbers of relocations of residential and business property owners and tenants. Utilizing the paper-based method necessarily requires manual collection, organization and calculation which are likely expensive and inefficient, both in terms of dedicated staff time and dollars spent.

Respondents: Each State DOT will be asked to respond, as well as a limited number (5-10) of local government agencies that have large and complex transportation programs. Each invited agency will be asked to respond to a one-time survey containing questions about the agency's ROW cost estimation process and management.

Frequency: There will be one survey only.

Estimated Average Burden per Response: Approximately 8-16 person-hours to fully and accurately respond to the survey, depending on the size and complexity of an individual agency's transportation program.

Estimated Total Annual Burden Hours: Approximately 900 hours. (This is the estimated total burden, for approximately 60 State and local

government transportation agencies to respond to a single survey).

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burdens; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.48.

Issued On: January 17, 2018.

Michael Howell,

FHWA Information Collection Officer.
