SUPPLEMENTARY INFORMATION:**I. Abstract**

The U.S. Census Bureau plans to continue the current Office of Management and Budget clearance for the Annual Survey of School System Finances. The Annual Survey of School System Finances is the only comprehensive source of public elementary-secondary school system finance data collected on a nationwide scale using uniform definitions, concepts, and procedures. The collection covers the revenues, expenditures, debt, and assets of all public elementary-secondary school systems. This data collection has been coordinated with the National Center for Education Statistics (NCES). The NCES uses this collection to satisfy its need for school finance data.

Fiscal data provided by respondents aid data users in measuring the effectiveness of resource allocation. The products of this data collection make it possible for data users to search a single database to obtain information on such

things as per pupil expenditures and the percent of state, local, and federal funding for each school system.

Elementary-secondary education related spending is the single largest financial activity of state and local governments. Education finance statistics provided by the Census Bureau allow for analyses of how public elementary-secondary school systems receive their funding and how they are spending their funds.

II. Method of Collection

A letter is mailed electronically at the beginning of each survey period to solicit the assistance of the state education agencies. This letter officially announces the opening of the data collection period and requests some administrative data, such as the estimated date of submission, any change to the reporting format from prior year, and updated contact information for the state coordinator.

The survey form (F-33) contains item descriptions and definitions of the elementary-secondary education finance items collected jointly by the Census Bureau and NCES. It is used primarily as a worksheet and instruction guide by the state education agencies providing school finance data centrally for the school systems in their respective states. The Census Bureau collects almost all of the finance data for local school systems from state education agency databases through central collection arrangements with the state education agencies. The states transfer this information in electronic format over the internet via file transfer protocol. The Census Bureau has also facilitated central collection of school system finance data by accepting data in multiple formats.

Supplemental forms are sent to local school systems in states where the state education agency cannot centrally provide information on assets (F-33-L1), indebtedness (F-33-L2), or both (F-33-L3).
