**Abstract:** Regulations implementing section 301(h) of the Clean Water Act (CWA) are found at 40 CFR part 125, subpart G. The section 301(h) program involves collecting information from two sources: (1) The municipal wastewater treatment facility, commonly called a publicly owned treatment works (POTW), and (2) the state in which the POTW is located. A POTW holding a current waiver or reapplying for a waiver provides application, monitoring, and toxic control program information. The state provides information on its determination whether the discharge under the proposed conditions of the waiver ensures the protection of water quality, biological habitats, and beneficial uses of receiving waters and whether the discharge will result in additional treatment, pollution control, or any other requirement for any other point or nonpoint sources. The state also provides information to certify that the discharge will meet all applicable state laws and that the state accepts all permit conditions. There are 4 situations where information will be required under the section 301(h)

program: (1) A POTW reapplying for a section 301(h) waiver. As the permits with section 301(h) waivers reach their expiration dates, EPA must have updated information on the discharge to determine whether the section 301(h) criteria are still being met and whether the section 301(h) waiver should be reissued. (2) Monitoring and toxic control program information: Once a waiver has been granted, EPA must continue to assess whether the discharge is meeting section 301(h) criteria, and that the receiving water quality, biological habitats, and beneficial uses of the receiving waters are protected. To do this, EPA needs monitoring information furnished by the permittee. (3) Application revision information: Section 125.59(d) of 40 CFR allows a POTW to revise its application one time only, following a tentative decision by EPA to deny the waiver request. In its application revision, the POTW usually corrects deficiencies and changes proposed treatment levels as well as outfall and diffuser locations. The application revision is a voluntary submission for the applicant, and a letter of intent to revise the application must be submitted within 45 days of EPA's tentative decision (40 CFR 125.59(f)). (4) State determination and state certification information: For revised or renewal applications for section 301(h) waivers, EPA needs a state determination. The state determines whether all state laws (including water quality standards) are satisfied. This helps ensure that water quality, biological habitats, and beneficial uses of receiving waters are protected. Additionally, the state must determine if the applicant's discharge will result in additional treatment, pollution control, or any other requirement for any other point or nonpoint sources. EPA also needs the CWA section 401(a)(1) certification information to ensure that all state water quality laws are met by any permit it issues with a section 301(h) modification, and the state accepts all the permit conditions. This information is the means by which the state can exercise its authority to concur with or deny a section 301(h) decision made by the EPA Regional Office.

**Form Numbers:** None.

**Respondents/affected entities:** Municipalities that currently have section 301(h) waivers from secondary treatment, or have applied for a renewal of a section 301(h) waiver, and the states within which these municipalities are located.

**Respondent's obligation to respond:** Required to obtain or retain a benefit.

**Estimated number of respondents:** 34 (total).

**Frequency of response:** From once every five years, to varies case-by-case, depending on the category of information.

**Total estimated burden:** 40,040 hours (per year). Burden is defined at 5 CFR 1320.3(b).

**Total estimated cost:** \$1.1 million (per year), includes \$0 annualized capital or operation & maintenance costs.

**Changes in the Estimates:** There is a decrease of hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to changes in respondent universe, program status, information needs, and use of technology.

**Partial Lift of Freeze on Filing Petitions for Rulemaking To Change Television Stations Community of License**

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice.

**SUMMARY:** This document announces that the Media Bureau is partially lifting the freeze on filing rulemaking petitions to change a full power television station's community of license, where no technical facility change is required.

**DATES:** February 12, 2018.

**FOR FURTHER INFORMATION CONTACT:**

Joyce Bernstein, *Joyce.Bernstein@fcc.gov*, or Kevin Harding, *Kevin.Harding@fcc.gov*, Video Division, Media Bureau, Federal Communications Commission.

**SUPPLEMENTARY INFORMATION:** On August 3, 2004, in connection with the development of a channel election and repacking process in advance of the DTV transition, the Media Bureau imposed a freeze on the filing of petitions requesting new channels or service areas for full power television stations in order to ensure a stable database in connection with that process. Although the DTV transition was completed in 2009, the Commission continued the freezes as a result of the National Broadband Plan, which recommended that the Commission reallocate spectrum for new broadband services and repack television channels to increase the efficiency of channel use. Auction 1000, which was conducted pursuant to Title VI of the Middle Class Tax Relief and Job Creation Act of 2012, was completed on April 13, 2017, and a 39-month post-auction transition period is underway during which some broadcast television stations will be relicensed to new channel assignments.

Because the DTV transition is complete and the post-incentive auction transition is underway, it is no longer necessary to freeze community of license petitions that do not require a change in the station's service area. The freeze on the filing of petitions for rulemaking for new station channel allotments, for changes in licensed
