I. Background

The Act at Section 110(a)(2)(C) requires states to develop and submit to EPA for approval into the SIP, preconstruction review and permitting programs applicable to certain new and modified stationary sources of air pollutants for attainment and nonattainment areas that cover both major and minor new sources and modifications, collectively referred to as the NSR SIP. The CAA NSR SIP program is composed of three separate programs: Prevention of Significant Deterioration (PSD), Nonattainment New Source Review (NNSR), and Minor NSR. The EPA codified minimum requirements for these State permitting programs including public participation and notification requirements at 40 CFR 51.160–51.164. Requirements specific to construction of new stationary sources and major modifications in nonattainment areas are codified at 40 CFR 51.165 for the NNSR program. Requirements for permitting of new stationary sources and major modifications in attainment areas subject to PSD, including additional public participation requirements, are found at 40 CFR 51.166. This proposed approval action will address four separate revisions to the Texas NSR SIP submitted on December 12, 2016 and February 21, 2017. On December 12, 2016, the Texas Commission on Environmental Quality (TCEQ) submitted a revision to the major NSR program to remove from the Texas SIP the Compliance History provisions at 30
