Clean Air Act Operating Permit Program; Petitions for Objection to State Operating Permits for Tennessee Valley Authority—Gallatin Fossil Plant (Sumner County, Tennessee)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final order on petitions to object to state operating permits.

SUMMARY: The Environmental Protection Agency (EPA) Administrator signed an Order, dated January 30, 2018, denying the petitions submitted by Sierra Club (Petitioner) objecting to a proposed Clean Air Act (CAA) title V operating permit issued to Tennessee Valley Authority (TVA) for its Gallatin Fossil Fuel Plant located in Gallatin, Sumner County, Tennessee. The Order responds to two petitions: The first, dated August 8, 2016, requested that the EPA object to the proposed renewal permit no. 561209; the second, dated November 20, 2017, requested that the EPA object to the proposed significant modification to permit no. 561209. Both permitting actions were issued by the Tennessee Department of Environment and Conservation (TDEC). The Order constitutes a final action on the petitions addressed therein.

ADDRESSES: Copies of the Order, the petitions, and all pertinent information relating thereto are on file at the following location: EPA Region 4; Air, Pesticides and Toxics Management Division; 61 Forsyth Street SW; Atlanta, Georgia 30303–8960. The Order is also available electronically at the following address: <https://wcms.epa.gov/sites/production/files/2018-02/documents/tvagallatinorder2018.pdf>.

FOR FURTHER INFORMATION CONTACT: Art Hofmeister, Air Permits Section, EPA Region 4, at (404) 562–9115 or hofmeister.art@epa.gov.

SUPPLEMENTARY INFORMATION: The CAA affords the EPA a 45-day period to review and, as appropriate, the authority to object to operating permits proposed by state permitting authorities under title V of the CAA, 42 U.S.C. 7661–7661f. Section 505(b)(2) of the CAA and 40 CFR 70.8(d) authorize any person to petition the EPA Administrator to object to a title V operating permit within 60 days after the expiration of the EPA’s 45-day review period if EPA has not objected on its own initiative. Petitions must be based only on objections to the permit that were raised with reasonable specificity during the public comment period provided by the state, unless the petitioner demonstrates that it was impracticable to raise these issues during the comment period or the grounds for the issues arose after this period. Pursuant to sections 307(b) and 505(b)(2) of the CAA, a petition for judicial review of those parts of the Order that deny issues in the petition may be filed in the United States Court of Appeals for the appropriate circuit within 60 days from the date this notice is published in the **Federal Register**.

Petitioner submitted petitions requesting that the EPA object to the proposed CAA title V operating permit no. 561209 and the subsequent significant modification to this permit., both issued by TDEC to TVA. Petitioner claims that these permitting actions: Fail to include monitoring requirements adequate to ensure compliance with opacity, particulate matter, and fugitive dust requirements; fail to include reporting requirements to ensure compliance with a previous consent decree; include startup/shutdown provisions that are inconsistent with the CAA; impose an unreasonably permissive limit for sulfur dioxide (SO₂); and include a limit that fails to protect the one-hour National Ambient Air Quality Standard for SO₂.

On January 30, 2018, the Administrator issued an Order denying

the petitions. The Order explains EPA's basis for denying the petitions.

Dated: February 8, 2018.

Onis "Trey" Glenn, III,

Regional Administrator, Region 4.

Proposed Information Collection Request; Comment Request; Regulation of Fuels and Fuel Additives: Detergent Gasoline

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), Regulation of Fuels and Fuel Additives: Detergent Gasoline (EPA ICR No. 1655.10, OMB Control No. 2060-0275), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed reinstatement of the ICR, which was approved through November 30, 2017. Public comments were previously requested via the **Federal Register** on October 6, 2017 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Comments must be submitted on or before March 30, 2018.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA-HQ-OAR-2007-0595, online using <https://www.regulations.gov> (our preferred method), by email to a-and-r-docket@epa.gov, or by mail to: (1) EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460, and (2) OMB via email to oria_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential

Business Information (CBI) or other information whose disclosure is restricted by statute.

Abstract: Gasoline combustion results in the formation of engine deposits. The accumulation of deposits, particularly in the orifices of fuel injectors and on intake valves, typically results in increased emissions and reduced engine performance. As fuel injectors replaced carburetors in the 1980's, a number of vehicle manufacturers experienced problems with deposit formation. Detergent additives, which had been available for years to control deposits in carbureted vehicles, were improved to accommodate the new technology. However, their use was voluntary and there were no regulatory standards by which to gauge their effectiveness. Congress recognized the importance of effective detergent additives in minimizing vehicle emissions, and added Section 211(1) in the Clean Air Act Amendments of 1990. It required gasoline to contain detergent additives, effective January 1, 1995, and provided EPA with the authority to establish specifications for such additives. The regulations at 40 CFR 80, Subpart G implemented certification requirements for detergents and imposed a variety of recordkeeping and reporting requirements for certain parties involved with detergents, gasoline, or post-refinery component (any gasoline blending stock or any oxygenate that is blended with gasoline subsequent to the gasoline refining process (PRC)). All gasolines must contain certified detergents, with the exception of research, racing, and aviation gasolines.

Form Numbers: None

Respondents/affected entities: The respondents are related to the following major group Standard Industrialization Classification (SIC) codes: 5172-Petroleum Products and 2911-Petroleum Refining. The respondents are related to the following major group NAICS codes: 324110-Petroleum Refineries; 324199-All Other Petroleum and Coal Products Manufacturing; 325110-Petrochemical Manufacturing; 325199-All Other Basic Organic Chemical Manufacturing; 424710-Petroleum Bulk Stations and Terminals; and 424720-Petroleum and Petroleum Products Merchant Wholesalers (except Bulk Stations and Terminals).

Respondent's obligation to respond: Mandatory per 40 CFR 80, Subpart G.

Estimated number of respondents: 1,354 (total).

Frequency of response: On occasion.

Total estimated burden: 220,181 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$16,554,566.00 (per year), which includes \$335,040.00 annualized capital or operation & maintenance costs.

Changes in Estimates: There is no increase of hours in the total estimated respondent burden compared with the ICR currently approved by OMB. The respondent universe and responses also remain the same in this collection. There is a decrease in cost to the industry of \$2,281,002 per year due to a correction in industry labor costs.

Courtney Kerwin,

Director, Regulatory Support Division.
