[Docket No. OSHA-H005C-2006-0870]

RIN 1218-AB76

Occupational Exposure to Beryllium

AGENCY: Occupational Safety and Health Administration (OSHA), Department of Labor.

ACTION: Final rule; OMB information collection approval.

SUMMARY: This rule is a technical amendment announcing that OMB has

approved the collection of information contained in OSHA's standards for Occupational Exposure to Beryllium and Beryllium Compounds in General Industry, and revising OSHA's regulations to reflect that approval. The OMB approval number is 1218-0267.

DATES: Effective March 7, 2018.

FOR FURTHER INFORMATION CONTACT:

Charles McCormick, OSHA, Directorate of Standards and Guidance, U.S. Department of Labor; telephone (202) 693-2222.

SUPPLEMENTARY INFORMATION: OSHA published a final rule on January 9, 2017, amending its existing standards for the Occupational Exposure to Beryllium and Beryllium Compounds. OSHA determined that employees exposed to beryllium at the previous permissible exposure limits face a significant risk of material impairment to their health. The evidence in the record for this rulemaking indicates that workers exposed to beryllium are at increased risk of developing chronic beryllium disease and lung cancer. The final rule establishes new permissible exposure limits of 0.2 micrograms of beryllium per cubic meters ($\mu\text{g}/\text{m}^3$) of air as an 8-hour time weighted average and 2.0 $\mu\text{g}/\text{m}^3$ as a short term exposure limit determined over a sampling period of 15 minutes. It also includes other provisions to protect employees, such as requirements for exposure assessment, methods for controlling exposure, respiratory protection, personal protective clothing and equipment, housekeeping, medical surveillance, hazard communication, and recordkeeping.

OSHA issued three separate standards (one for general industry, one for shipyards, and one for construction) in order to tailor requirements to the circumstances found in these sectors. The effective date of those standards was March 10, 2017.

Consistent with the Paperwork Reduction Act (PRA) (44 U.S.C. 3501-3520), the **Federal Register** notice for the Occupational Exposure to Beryllium and Beryllium Compounds final rule states that employers do not have to comply with the collection of information until OMB approves those collections of information, and the Department of Labor publishes a notice in the **Federal Register** announcing this approval and the control number assigned by OMB to the final rule's collection of information. Under 5 CFR 1320.5(b), an agency may not conduct or sponsor a collection of information unless: (1) The collection of information displays a current, valid OMB control number, and (2) The Agency informs members of the public who are required to respond to the collection of information that they are not required to do so unless the agency displays a currently valid OMB control number for the collection of information.

The revision of these standards is a technical amendment to increase public awareness of OMB's approval of the collection of information. The Agency notes that the public has already had the opportunity to comment on the collections of information, and OMB has approved them. Opportunity for public comment on this final rule is therefore unnecessary.

The final Occupational Exposure to Beryllium and Beryllium Compounds standards impose new collections of information for the purposes of the PRA. The collections of information in the rule are needed to assist employers in identifying and controlling exposure to beryllium and beryllium compounds in the workplace, and to address adverse health effects related to beryllium. OSHA will also use records developed in response to these standards to determine compliance with OSHA standards.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Withdrawal of direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) received adverse comment on the direct final rule titled "Protection of Stratospheric Ozone: Revision to References for Refrigeration and Air Conditioning Sector to Incorporate Latest Edition of Certain Industry, Consensus-based Standards," published on December 11, 2017. Therefore, through this document we are withdrawing that direct final rule.

DATES: The direct final rule published at 82 FR 58122 on December 11, 2017 is withdrawn effective March 7, 2018.

FOR FURTHER INFORMATION CONTACT: Chenise Farquharson, Stratospheric Protection Division, Office of Atmospheric Programs (Mail Code 6205T), U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue NW, Washington, DC 20460; telephone number: (202) 564-7768; email address: *farquharson.chenise@epa.gov*.

SUPPLEMENTARY INFORMATION: The EPA received adverse comment on the direct final rule "Protection of Stratospheric Ozone: Revision to References for Refrigeration and Air Conditioning Sector to Incorporate Latest Edition of Certain Industry, Consensus-based Standards," published on December 11, 2017 (82 FR 58122). The direct final rule stated that if the Agency received adverse comment by January 25, 2018, the direct final rule would not take effect and EPA would publish a timely withdrawal in the **Federal Register**. Because we received adverse comment

on that direct final rule during that comment period we are withdrawing the direct final rule in this document. We will address all significant comments in any subsequent final action, which would be based on the parallel proposed rule also published on December 11, 2017 (82 FR 58154). As stated in the direct final rule and the parallel proposed rule, there will not be a second comment period on this action.
