## FEDERAL RESERVE SYSTEM

### Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 10, 2018.

*A. Federal Reserve Bank of Kansas City (Dennis Denney, Assistant Vice President) 1 Memorial Drive, Kansas City, Missouri 64198-0001:*

1. *RCB Holding Company, Inc., Claremore, Oklahoma; to acquire 100 percent of the voting shares of Central Bank and Trust Co., Hutchinson, Kansas.*

Board of Governors of the Federal Reserve System, March 8, 2018.

**Ann E. Misback,**

*Secretary of the Board.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control and Prevention

[60Day-2018-1091; Docket No. CDC-2018-0022]

#### Proposed Data Collection Submitted for Public Comment and Recommendations

**AGENCY:** Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

**ACTION:** Notice with comment period.

**SUMMARY:** The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed and/or continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled "Using Qualitative Methods to Understand Issues in HIV Prevention, Care and Treatment in the United States." CDC's goal for this generic information collection mechanism is to conduct qualitative studies to quickly identify barriers and facilitators to HIV prevention, care and treatment in specific regions with high HIV burden in the US.

**DATES:** CDC must receive written comments on or before May 14, 2018.

**ADDRESSES:** You may submit comments, identified by Docket No. CDC-2018-0022 by any of the following methods:

- *Federal eRulemaking Portal: Regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Leroy A. Richardson, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS-D74, Atlanta, Georgia 30329.

*Instructions:* All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *Regulations.gov*.

**Please note:** Submit all comments through the Federal eRulemaking portal (*regulations.gov*) or by U.S. mail to the address listed above.

**FOR FURTHER INFORMATION CONTACT:** To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Leroy A. Richardson, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road, NE, MS-D74, Atlanta, Georgia 30329; phone: 404-639-7570; Email: *omb@cdc.gov*.

#### SUPPLEMENTARY INFORMATION:

Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
5. Assess information collection costs.

#### Proposed Project

Using Qualitative Methods to Understand Issues in HIV Prevention, Care and Treatment in the United States (OMB Control Number 0920-1091; expires 12/31/2018)—Extension—National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention, Centers for Disease Control and Prevention (CDC).

**Background and Brief Description**

The CDC’s National Center on HIV/AIDS, Viral Hepatitis, STD and TB Prevention (NCHHSTP), Division of HIV/AIDS Prevention (DHAP) seeks a three-year extension to conduct qualitative studies to quickly identify barriers and facilitators to HIV prevention, care and treatment in specific regions with high HIV burden in the US. Proposed activities remain consistent with the national HIV prevention goals, the CDC Division of HIV/AIDS Prevention (DHAP) Strategic Plan, and DHAP’s High-impact HIV Prevention approach.

The purposes for each data collection study supported under this umbrella generic information collection plan will be to understand specific barriers and facilitators to local HIV prevention, care and treatment in the United States and territories. For example, each study will seek to identify ways to improve programmatic activities along the continuum of HIV prevention, treatment and care for different populations residing in different geographic settings with greatest burden of HIV.

The target populations for the studies include, but are not limited to: (1) Persons living with HIV who are in treatment; (2) persons living with HIV who are out of treatment and who may or may not be seeking treatment at healthcare facilities; (3) persons at high risk for HIV acquisition (HIV negative) and HIV transmission (HIV positive); (4) persons from groups at high risk for HIV including gay, bisexual and other MSM, transgender persons, and injection and non-injection drug users; (5) persons from racial and ethnic minorities; and (6) healthcare providers or other

professionals who provide HIV prevention, care and treatment services. Other populations may include individuals who provide non-HIV services or otherwise interact with persons living with HIV or persons at risk for HIV acquisition.

Studies will only provide local contextual information about the barriers and facilitators to HIV prevention, care, and treatment experienced by specific communities at risk for acquiring HIV infection, by HIV-positive persons across the HIV care continuum, and by organizations or individuals providing HIV prevention, care, treatment, and related support services.

Data collection methods used in any of the specific studies primarily will consist of rapid qualitative assessment methodologies, such as semi-structured and in-depth qualitative interviews, focus groups; direct observations; document reviews; and short structured surveys. Data will be analyzed using well-established qualitative analysis methods, such as coding interviews for themes about barriers and successes to HIV prevention, care, and treatment. Structured response surveys will be analyzed using descriptive statistics and other appropriate statistical methods.

CDC will use the results from each specific data collection study to help identify ways to improve local programmatic activities for specific communities along the continuum of HIV prevention, treatment and care for populations and areas with the greatest HIV burden. CDC will communicate study outcomes to local stakeholders and organizations in positions to consider and implement site-specific

improvements in HIV prevention, care, and treatment for each of the study sites examined. For stakeholders, organizations, or agencies outside the local affected communities, all communications will include clear discussion of the limitations of the region-specific, qualitative methods and the non-generalizability of the study outcomes.

For a given year, each separate data collection will range from 30 (minimum) to 200 (maximum) respondents, based on the nature and scope of the research purposes. For example, if there are three data collections, the maximum combined number of expected respondents is 600. In a given year, CDC anticipates the need to screen 1,600 persons to identify 800 eligible persons, of which 600 persons will agree to participate.

CDC anticipates that screener forms will take 5 minutes to complete each, contact information forms will take 1 minute to complete each, and consent forms will take 5 minutes to complete each. CDC anticipates study eligibility for 50 percent of the targeted populations screened. Of eligible persons, 75% will agree to participate.

Brief structured surveys will take 15 minutes to complete. In-depth interviews or focus groups with respondents are expected to take 60 minutes (1 hour) to complete. In-depth interviews or focus groups with healthcare providers are expected to take 45 minutes to complete.

The total annual response burden, based on an average of 600 study respondents per year (assuming three large data collections involving 200 participants each), is 918 hours.

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
General Public—Adults .....	Study Screener .....	1,600	1	5/60	133
General Public—Adults .....	Contact Information Form .....	600	1	1/60	10
General Public—Adults .....	Consent Form .....	600	1	5/60	50
General Public—Adults .....	Demographic Survey .....	500	1	15/60	125
General Public—Adults .....	Interview Guide .....	500	1	1	500
General Public—Adults .....	Provider Demographic Survey .....	100	1	15/60	25
General Public—Adults .....	Provider Interview Guide .....	100	1	45/60	75
Total .....	.....	.....	.....	.....	918

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control and Prevention

[CDC-2017-0114; Docket Number NIOSH-305]

#### Final National Occupational Research Agenda for Transportation, Warehousing and Utilities

**AGENCY:** National Institute for  
Occupational Safety and Health  
(NIOSH) of the Centers for Disease  
Control and Prevention (CDC),  
Department of Health and Human  
Services (HHS).

**ACTION:** Notice of availability.

**SUMMARY:** NIOSH announces the  
availability of the final National  
Occupational Research Agenda for  
Transportation, Warehousing and  
Utilities

**DATES:** The final document was  
published on March 7, 2018.

**ADDRESSES:** The document may be  
obtained at the following link: [https://  
www.cdc.gov/niosh/nora/sectors/twu/  
agenda.html](https://www.cdc.gov/niosh/nora/sectors/twu/agenda.html)

### Food and Drug Administration

[Docket No. FDA-2017-N-0493]

#### Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Utilization of Adequate Provision Among Low to Non-Internet Users

**AGENCY:** Food and Drug Administration,  
HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug  
Administration (FDA) is announcing  
that a proposed collection of  
information has been submitted to the  
Office of Management and Budget  
(OMB) for review and clearance under  
the Paperwork Reduction Act of 1995.

**DATES:** Submit either electronic or  
written comments on the collection of  
information by April 12, 2018.

**ADDRESSES:** To ensure that comments on  
the information collection are received,  
OMB recommends that written  
comments be faxed to the Office of  
Information and Regulatory Affairs,  
OMB, Attn: FDA Desk Officer, Fax: 202-  
395-7285, or emailed to [aira  
submission@omb.eop.gov](mailto:aira_submission@omb.eop.gov). All  
comments should be identified with the  
OMB control number 0910-New and  
title "Utilization of Adequate Provision  
Among Low to Non-internet Users."  
Also include the FDA docket number  
found in brackets in the heading of this  
document.

fda.hhs.gov](mailto:PRAStaff@fda.hhs.gov).

#### SUPPLEMENTARY INFORMATION:

##### I. Background

In compliance with 44 U.S.C. 3507,  
FDA has submitted the following  
proposed collection of information to  
OMB for review and clearance.

##### Utilization of Adequate Provision Among Low to Non-Internet Users

OMB Control Number 0910-NEW

Section 1701(a)(4) of the Public  
Health Service Act (42 U.S.C.  
300u(a)(4)) authorizes FDA to conduct  
research relating to health information.  
Section 1003(d)(2)(C) of the Federal  
Food, Drug, and Cosmetic Act (FD&C  
Act) (21 U.S.C. 393(d)(2)(C)) authorizes  
FDA to conduct research relating to

drugs and other FDA regulated products  
in carrying out the provisions of the  
FD&C Act.

Prescription drug advertising  
regulations require that broadcast  
advertisements containing product  
claims present the product's major side  
effects and contraindications in either  
audio or audio and visual parts of the  
advertisement (21 CFR 202.1(e)(1)); this  
is often called the major statement. The  
regulations also require that broadcast  
advertisements contain a brief summary  
of all necessary information related to  
side effects and contraindications or  
that "adequate provision" be made for  
dissemination of the approved package  
labeling in connection with the  
broadcast (§ 202.1(e)(1)). The  
requirement for adequate provision is  
generally fulfilled when a firm gives  
consumers the option of obtaining FDA-  
required labeling or other information  
via a toll-free telephone number,  
through print advertisements or product  
brochures, through information  
disseminated at health care provider  
offices or pharmacies, and through the  
internet (Ref. 1). The purpose of  
including all four elements is to ensure  
that most of a potentially diverse  
audience can access the information.

Internet accessibility is increasing, but  
many members of certain demographic  
groups (e.g., older adults, low  
socioeconomic status individuals)  
nonetheless report that the internet is  
inaccessible to them either as a resource  
or due to limited knowledge, and so a  
website alone may not adequately serve  
all potential audiences (Refs. 2 and 3).  
Similarly, some consumers may prefer  
to consult sources other than a health  
care provider to conduct initial  
research, for privacy reasons or  
otherwise (Refs. 1, 4, and 5). In light  
of these considerations, the toll-free  
number and print ad may provide  
special value to consumers who are low  
to non-internet users and/or those who  
value privacy when conducting initial  
research on a medication, though not  
necessarily unique value relative to one  
another. As such, a primary purpose of  
this research is to examine the value of  
including both the toll-free number and  
print ad as part of adequate provision in  
direct-to-consumer (DTC) prescription  
drug broadcast ads. We will also  
investigate the ability and willingness of  
low to non-internet users to make use of  
internet resources if other options were  
unavailable. These questions will be  
assessed using a survey methodology  
administered via telephone.

In addition, building on concurrent  
FDA research regarding drug risk
