POLICY JUSTIFICATION

Japan—MK 15 Phalanx Close-in Weapon System (CIWS) Block IB Baseline 2 Conversion Kits

The Government of Japan has requested to buy twenty-four (24) MK 15 Phalanx Close-in Weapon System (CIWS) Block IB Baseline 1 to MK 15 Phalanx Block IB Baseline 2 conversion kits. Also included is support equipment, spare parts, publications, software and associated support, and logistical support services, and other related elements of logistical and program support. The estimated total case value is \$45 million.

This proposed sale will contribute to the foreign policy and national security of the United States by improving the security of a major ally that has been, and continues to be, a force for political stability and economic progress in the Asia-Pacific region.

The proposed sale will improve Japan's capability in current and future defensive efforts. Japan will use the enhanced capability as a deterrent to regional threats and to strengthen homeland defense.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Raytheon Missile Systems, Tucson, AZ. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the permanent assignment of additional U.S. Government or contractor representatives in Japan.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 17–79

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The CIWS Block IB Baseline 2 represents an increase in threat acquisition and firepower accuracy over previous Block 1 Baseline configurations. The Baseline 2 variant includes a radar improvement upgrade and an electro-optical sensor to improve weapon system performance against low-observable, sea-skimming threats, and provides improved capability to concentrate hard-kill ordnance in a

tighter pattern on the threat. The CIWS mount and spare hardware are UNCLASSIFIED. The radar improvement/upgrade is the most sensitive portion of the Baseline 2 configuration.

2. The CIWS Block 1B Baseline 2 systems and upgrade kits will result in the transfer of a highly accurate close-in engagement technology and ship self-defense capability. The equipment, hardware, and the majority of documentation are UNCLASSIFIED. The embedded software and operational performance are classified CONFIDENTIAL. The seeker/electro-optical control section and the target detector are UNCLASSIFIED, but contain a sensitive state-of-the-art technology. Technical Manuals used to support the operation and provisioning of organizational-level maintenance are CONFIDENTIAL. The technical and operational data identified above is classified to protect vulnerabilities, design and performance parameters, and similar critical information.

3. If a technologically advanced adversary were to obtain knowledge of specific hardware, the information could be used to develop countermeasures which might reduce weapons system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Japan can provide substantially the same degree of protection for sensitive technology being released as the U.S. Government. This proposed sustainment program is necessary to the furtherance of the U.S. foreign policy and national security objectives outlined in the policy justification.

5. All defense articles and services listed in this transmittal are authorized for release and export to the Government of Japan.
