BILLING CODE 7709-02-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG-2018-0108]

Drawbridge Operation Regulation; Narrow Bay, Suffolk County, NY

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the Smith Point Bridge across Narrow Bay, mile 6.1, at Suffolk County, New York. This deviation is necessary in order to facilitate a Triathlon Event and allows the bridge to remain in the closed position for two hours.

DATES: This deviation is effective from 7 a.m. to 9 a.m. on August 5, 2018.

ADDRESSES: The docket for this deviation, USCG-2018-0108, is available at <http://www.regulations.gov>. Type the docket number in the "SEARCH" box and click "SEARCH." Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email Stephanie Lopez, Bridge Management Specialist, First District Bridge Branch, U.S. Coast Guard; telephone 212-514-4335, email Stephanie.E.Lopez@uscg.mil.

SUPPLEMENTARY INFORMATION: Event Power requested and the bridge owner, Suffolk County DPW, concurred with this temporary deviation from the normal operating schedule to facilitate a Triathlon Event.

The Smith Point Bridge across Narrow Bay, mile 6.1, has a vertical clearance of 18 feet at mean high water and 19 feet at mean low water in the closed position. The existing drawbridge operating regulation is listed at 33 CFR 117.799(d).

The temporary deviation will allow the Smith Point Bridge to remain closed from 7 a.m. to 9 a.m. on August 5, 2018. Narrow Bay is transited by seasonal recreational vessels. Coordination with Coast Guard Sector Long Island Sound has indicated no mariner objections to

the proposed short-term closure of the draw.

Vessels that can pass under the bridge without an opening may do so at all times. The bridge will be able to open for emergencies. There is no alternate route for vessels to pass.

The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: March 6, 2018.

Christopher J. Bisignano,

Supervisory Bridge Management Specialist, First Coast Guard District.

BILLING CODE 9110-04-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG-2018-0033]

Drawbridge Operation Regulation; New Jersey Intracoastal Waterway, Beach Thorofare, Margate City, NJ

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation; modification.

SUMMARY: The Coast Guard has modified a temporary deviation from the operating schedule that governs the Margate Boulevard/Margate Bridge, which carries Margate Boulevard across the New Jersey Intracoastal Waterway, Beach Thorofare, mile 74.0, at Margate City, NJ. This modified deviation is necessary to facilitate bridge maintenance. This modified deviation allows the bridge to remain in the closed-to-navigation position.

DATES: This modified deviation is effective without actual notice from March 15, 2018 through 7 p.m. on March 26, 2018. For the purposes of enforcement, actual notice will be used from 7:01 p.m. on March 12, 2018 until March 15, 2018.

ADDRESSES: The docket for this deviation, [USCG-2018-0033] is available at <http://www.regulations.gov>.

Type the docket number in the "SEARCH" box and click "SEARCH". Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this modified temporary deviation, call or email Mr. Michael R. Thorogood, Bridge Administration Branch Fifth District, Coast Guard, telephone 757-398-6557, email Michael.R.Thorogood@uscg.mil.

SUPPLEMENTARY INFORMATION: On February 1, 2018, the Coast Guard published a temporary deviation entitled, "Drawbridge Operation Regulation; New Jersey Intracoastal Waterway, Beach Thorofare, Margate City, NJ" in the **Federal Register** (83 FR 4585). That document resulted from Ole Hansen and Sons, Inc.'s, request for a temporary deviation, occurring from 7 a.m. on February 26, 2018, through 7 p.m. on March 12, 2018, from normal operation of the drawbridge to facilitate bridge maintenance. Subsequent to the approval of that request, Ole Hansen & Sons Inc. requested a modification, extending the temporary deviation from 7:01 p.m. on March 12, 2018, through 7 p.m. on March 26, 2018, to allow more time to perform and complete bridge maintenance unable to be performed due to extreme inclement weather events during the previous temporary deviation. Therefore, the Coast Guard modifies the dates of the previously approved temporary deviation to allow the Margate Boulevard/Margate Bridge that carries Margate Boulevard across the New Jersey Intracoastal Waterway, Beach Thorofare, mile 74.0, at Margate City, NJ, to remain in the closed-to-navigation position from 7:01 p.m. on March 12, 2018, through 7 p.m., on March 26, 2018. The bridge has a vertical clearance of 14 feet above mean high water in the close position and unlimited clearance in the open position. The current operating schedule is set out in 33 CFR 117.5.

The Beach Thorofare is used by a variety of vessels including recreational vessels. The Coast Guard has carefully coordinated the restrictions with waterway users in publishing this temporary deviation.

Vessels able to pass through the bridge in the closed position may do so at any time. The bridge will not be able to open for emergencies and there is no immediate alternative route for vessels unable to pass through the bridge in the closed position. The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transit

to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: March 12, 2018.

Hal R. Pitts,

Bridge Program Manager, Fifth Coast Guard District.

BILLING CODE 9110-04-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 62

[EPA-R03-OAR-2017-0453; FRL-9975-33-Region 3]

Approval and Promulgation of State Air Quality Plans for Designated Facilities and Pollutants; City of Philadelphia; Control of Emissions From Existing Hospital/Medical/Infectious Waste Incinerator Units

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is taking final action to reaffirm and reapprove a negative declaration for existing hospital/medical/infectious waste incinerator (HMIWI) units within the City of Philadelphia. This negative declaration certifies that existing HMIWI units subject to the requirements of sections 111(d) and 129 of the Clean Air Act (CAA) do not exist within the jurisdictional boundaries of the Philadelphia Air Management Service (AMS). EPA is accepting the negative declaration in accordance with the requirements of the CAA.

DATES: This rule is effective on April 16, 2018.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA-R03-OAR-2017-0453. All documents in the docket are listed on the <http://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., confidential business information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through [http://](http://www.regulations.gov)

www.regulations.gov, or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Mike Gordon, (215) 814-2039, or by email at gordon.mike@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Sections 111(d) and 129 of the CAA require states to submit plans to control certain pollutants (designated pollutants) at existing solid waste combustor facilities (designated facilities) whenever standards of performance have been established under section 111(b) for new sources of the same type, and EPA has established emission guidelines (EG) for such existing sources. CAA section 129 directs EPA to establish standards of performance for new sources and emissions guidelines for existing sources for each category of solid waste incineration unit. CAA section 129(a) and (b). EPA also must specify numerical emissions limitations for particulate matter (total and fine), opacity (as appropriate), sulfur dioxide, hydrogen chloride, oxides of nitrogen, carbon monoxide, lead, cadmium, mercury, and dioxins and dibenzofurans. CAA section 129(a)(4).

On September 15, 1997 (62 FR 48348), EPA first promulgated HMIWI unit new source performance standards, 40 CFR part 60, subpart Ec, and emission guidelines for existing facilities, subpart Ce. These regulations were then amended on October 6, 2009 (74 FR 51368) and on April 4, 2011 (76 FR 18407).

The designated facilities to which the EG apply are existing HMIWI units that: (1) Commenced construction on or before June 20, 1996, or for which modification was commenced on or before March 16, 1998; or (2) commenced construction after June 20, 1996 but no later than December 1, 2008, or for which modification commenced after March 16, 1998 but no later than April 6, 2010, with limited exceptions as provided in paragraphs 40 CFR 60.32e(b) through (h).

Subpart B and Ce of 40 CFR part 60 establish procedures to be followed and requirements to be met in the development and submission of state plans for controlling designated pollutants from existing HMIWI facilities. Also, 40 CFR part 62 provides the procedural framework for the submission of these plans. When existing designated facilities are located in a state, the state must then develop and submit a plan for the control of the

designated pollutant. However, 40 CFR 60.23(b) and 62.06 provide that if there are no existing sources of the designated pollutant in the state, the state may submit a letter of certification to that effect (*i.e.*, negative declaration) in lieu of a plan. The negative declaration exempts the state from the requirements of subpart B that require the submittal of a section 111(d)/129(b) plan.

On October 12, 2017 (82 FR 47398 and 82 FR 47421), EPA simultaneously published a notice of proposed rulemaking (NPR) and a direct final rule (DFR) for the City of Philadelphia approving a negative declaration from Philadelphia AMS that there are no existing HMIWI units subject to the requirements of sections 111(d) and 129 of the CAA in its respective air pollution control jurisdiction. EPA explained that if it did not receive an adverse comment on the NPR, the DFR would take effect with no further administrative action. EPA received an adverse comment on the NPR and attempted to withdraw the DFR prior to its effective date of December 11, 2017. However, EPA inadvertently did not withdraw the DFR prior to that date and the rule prematurely became effective on December 11, 2017, revising 40 CFR part 62 to reflect the approval of the negative declaration. In the NPR, EPA had proposed to approve the negative declaration. In this final rulemaking, EPA is responding to the comment submitted on the proposed approval of the negative declaration and approving the negative declaration. This action supersedes the prior DFR which went into effect prematurely and had an effective date of December 11, 2017.

II. State Submittal and EPA Analysis

Philadelphia AMS has determined that there are no existing HMIWI units subject to the requirements of sections 111(d) and 129 of the CAA in its respective air pollution control jurisdiction. Accordingly, Philadelphia AMS submitted a negative declaration letter to EPA certifying this fact on August 2, 2011. The negative declaration letter and EPA's technical support document for this action are available in the docket for this rulemaking and online at www.regulations.gov.

III. Public Comment and EPA Response

EPA received one adverse comment on the proposed approval of the negative declaration for existing HMIWI units submitted by Philadelphia AMS.

Comment: The commenter stated that EPA must ensure that no additional HMIWI units have been constructed since the time of Philadelphia's
