

related to installed smoke and CO alarms. The survey team will then test residents' smoke and CO alarms. If any of the alarms do not work, the survey team will offer to replace them free of charge.

### B. Burden Hours

The survey interview will take between 20 to 60 minutes, depending on whether the survey is administered via the telephone (about 20 minutes) or by an in-home interview (60 minutes). We estimate the number of respondents to be 1,185. We estimate the total annual burden hours for respondents to be 1,422 hours based on the total time required to respond to the invitation, screener, and the actual survey. The monetized hourly cost is \$35.64, as defined by the average total hourly cost to employers for employee compensation for employees across all occupations as of September 2017, reported by the Bureau of Labor Statistics. Accordingly, we estimate the total annual cost burden to all respondents to be \$50,680. (1,422 hours × \$35.64 = \$50,680.). The total cost to the federal government for the contract to design and conduct the survey is \$721,773.

### C. Request for Comments

The CPSC invites comments on these topics:

- Whether the proposed collection of information is necessary for the proper performance of CPSC's functions, including whether the information will have practical utility;
- The accuracy of CPSC's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Ways to enhance the quality, utility, and clarity of the information to be collected; and
- Ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.
