SUPPLEMENTARY INFORMATION:

Title: FERC 725F, Mandatory Reliability Standard for Nuclear Plant Interface Coordination.

OMB Control No.: 1902-0249.

Type of Request: Three-year extension of the FERC-725F information collection requirements with no changes to the current reporting requirements.

Abstract: The Commission requires the information collected by the FERC-725F to implement the statutory provisions of section 215 of the Federal Power Act (FPA) (16 U.S.C. 824o). On August 8, 2005, the Electricity Modernization Act of 2005, which is Title XII, Subtitle A, of the Energy Policy Act of 2005 (EPAct 2005), was enacted into law.¹ EPAct 2005 added a new section 215 to the FPA, which required a Commission-certified Electric Reliability Organization (ERO) to develop mandatory and enforceable Reliability Standards, which are subject to Commission review and approval.

Once approved, the Reliability Standards may be enforced by the ERO subject to Commission oversight, or the Commission can independently enforce Reliability Standards.²

On February 3, 2006, the Commission issued Order No. 672, implementing section 215 of the FPA.³ Pursuant to Order No. 672, the Commission certified one organization, North American Electric Reliability Corporation (NERC), as the ERO. The Reliability Standards developed by the ERO and approved by the Commission apply to users, owners and operators of the Bulk-Power System as set forth in each Reliability Standard.

On November 19, 2007, NERC filed its petition for Commission approval of the Nuclear Plant Interface Coordination Reliability Standard, designated NUC-001-1. In Order No. 716, issued October 16, 2008, the Commission approved the standard while also directing certain revisions.⁴ Revised Reliability Standard, NUC-001-2, was filed with the Commission by NERC in August 2009 and subsequently approved by the Commission January 21, 2010.⁵ On November 4, 2014, in Docket No. RD14-13, the Commission approved revised Reliability Standard NUC-001-3.⁶

The purpose of Reliability Standard NUC-001-3 is to require coordination between Nuclear Plant Generator Operators and Transmission Entities for the purpose of ensuring nuclear plant

safe operation and shutdown.⁷ The Nuclear Reliability Standard applies to nuclear plant generator operators (generally nuclear power plant owners and operators, including licensees) and transmission entities, defined in the Reliability Standard as including a nuclear plant's suppliers of off-site power and related transmission and distribution services. To account for the variations in nuclear plant design and grid interconnection characteristics, the Reliability Standard defines transmission entities as all entities that are responsible for providing services related to Nuclear Plant Interface Requirements (NPIRs), and lists eleven types of functional entities (heretofore described as transmission entities) that could provide services related to NPIRs.⁸

FERC-725F information collection requirements include establishing and maintaining interface agreements, including record retention requirements. These agreements are not filed with FERC, but with the appropriate entities as established by the Reliability Standard.

Type of Respondents: Nuclear operators, nuclear plants, transmission entities.

*Estimate of Annual Burden:*⁹ The Commission estimates the average annual burden and cost¹⁰ for this information collection as follows.

FERC-725F	Number of respondents (1)	Annual number of responses per respondent (2)	Total number of responses (1)*(2)=(3)	Average burden hours & cost per response (\$) (rounded) (4)	Total annual burden hours & total annual cost (\$) (rounded) (3)*(4)=(5)	Cost per respondent (\$) (rounded) (5)÷(1)

⁵ *North American Electric Reliability Corporation*, 130 FERC 61,051 (2010). When the revised Reliability Standard was approved, the Commission did not go to OMB for approval. It is assumed that the changes made did not substantively affect the

information collection and therefore a formal submission to OMB was not needed.

The most recent OMB approval for FERC-725F was issued on 6/15/2015.

⁷ See Reliability Standard NUC-001-3 at <http://www.nerc.com/pa/Stand/Reliability%20Standards/NUC-001-3.pdf>.

⁸ The list of functional entities consists of transmission operators, transmission owners, transmission planners, transmission service providers, balancing authorities, reliability coordinators, planning coordinators, distribution providers, load-serving entities, generator owners and generator operators.

⁹ Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide

information to or for a Federal agency. Refer to 5 CFR 1320.3 for additional information.

¹⁰ The wage and benefit figures are based on the Bureau of Labor Statistics (BLS) data (at https://www.bls.gov/oes/current/naics2_22.htm) for May 2016 for Sector 22, Utilities. (The benefits figure is based on BLS data as of September 8, 2017, which indicates that wages are 69.6% and benefits are 30.4% of total salary (<http://www.bls.gov/news.release/ecec.nr0.htm>).

The estimated hourly cost (for wages plus benefits) for reporting requirements is \$84.23/hour, based on the average for an electrical engineer (occupation code 17-2071, \$68.12/hour), legal (occupation code 23-0000, \$143.68/hour), and office and administrative support (occupation code 43-0000, \$40.89/hour).

The estimated hourly cost (wages plus benefits) for record keeping is \$32.74/hour for a file clerk (occupation code 43-4071).

Total	¹² 360	26,402 hrs.; ¹³ \$2,100,236.

Comments: Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Secretary.

[Public Notice: 2018-6008]

Agency Information Collection Activities: Final Collection; Comment Request

AGENCY: Export-Import Bank of the United States.

ACTION: Submission for OMB review and comments request.

SUMMARY: The Export-Import Bank of the United States (EXIM), as a part of its continuing effort to reduce paperwork and respondent burden, invites the

¹¹ This figure of 120 transmission entities is based on the assumption that each agreement will be between 1 nuclear plant and 2 transmission entities (60 × 2 = 120). However, there is some double counting in this figure because some transmission entities may be party to multiple agreements with multiple nuclear plants. The double counting does not affect the burden estimate, and the correct number of unique respondents will be reported to OMB.

¹² The 180 respondents affected by the reporting requirements are also affected by the recordkeeping requirements.

¹³ The reporting requirements have not changed. The decrease in the number of respondents is due to: a) normal fluctuations in industry (e.g., companies merging and splitting, and coming into and going out of business), and b) no new agreements being issued due to the lack of new nuclear plants being developed.

general public and other Federal Agencies to comment on the proposed information collection, as required by the Paperwork Reduction Act of 1995.

This form will enable EXIM to identify the specific details of the proposed co-financing transaction between a U.S. exporter, EXIM, and a foreign export credit agency; the information collected includes vital facts such as the amount of U.S.-made content in the export, the amount of financing requested from EXIM, and the proposed financing amount from the foreign export credit agency. These details are necessary for approving this unique transaction structure and coordinating our support with that of the foreign export credit agency to ultimately complete the transaction and support U.S. exports—and U.S. jobs.

DATES: Comments should be received on or before May 29, 2018 to be assured of consideration.
