

FOR FURTHER INFORMATION CONTACT:

Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Colette.Pollard@hud.gov or telephone 202-402-3400. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877-8339.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: HUD Acquisition Regulation (HUDAR) (48 CFR 24).

OMB Approval Number: 2535-0091.

Type of Request: This is an extension of a currently approved collection. The HUDAR supplements the Federal Acquisition Regulation (FAR). Information collection required of the public is solely in connection with the acquisition process.

Form Number: HUD-770.

Description of the need for the information and proposed use: The HUDAR (48 CFR 24) contains the Department's supplement to the Federal Acquisition Regulations (FAR) 48 CFR Chapter 1. The FAR sets forth uniform policies and procedures applicable to Federal agencies in the procurement of personal property and non-personal services (including construction) and the procurement of real property by lease.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

- (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (2) The accuracy of the agency's estimate of the burden of the proposed collection of information;
- (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and
- (4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of

information technology, *e.g.*, permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: March 12, 2018.

Keith W. Surber,

Chief Procurement Officer.

Endangered and Threatened Wildlife and Plants; Draft Recovery Plan for Four Invertebrate Species of the Pecos River Valley

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comment.

SUMMARY: We, the Fish and Wildlife Service (Service), announce the availability of our draft recovery plan for four invertebrate species—Noel's Amphipod, Koster's springsnail, Roswell springsnail, and Pecos assimineae—all of which are listed as endangered under the Endangered Species Act of 1973, as amended (Act). These invertebrate species are currently found in southeastern New Mexico and southwest Texas. The draft recovery plan includes specific recovery objectives and criteria to be met in order to enable us to remove these species from the list of endangered and threatened wildlife and plants. We request review and comment on this plan from local, State, and Federal agencies; Tribes; and the public. We will also accept any new information on the status of these species throughout their range to assist in finalizing the recovery plan.

DATES: To ensure consideration, we must receive written comments on or before June 1, 2018. However, we will accept information about any species at any time.

ADDRESSES: If you wish to review the draft recovery plan, you may obtain a copy by any one of the following methods:

- *internet:* www.fws.gov/southwest/es/;
- *U.S. mail:* U.S. Fish and Wildlife Service, NM Ecological Services Field

Office, 2105 Osuna NE, Albuquerque, NM 87113; or

- *Telephone:* 505-346-2542.

If you wish to comment on the draft recovery plan, you may submit your comments in writing by any one of the following methods:

- *U.S. mail:* Field Supervisor, at the above address;
- *Hand-delivery:* New Mexico Ecological Services Office, at the above address;
- *Fax:* 505-346-2542; or
- *Email:* Debra_Hill@fws.gov.

For additional information about submitting comments, see the "Request for Public Comments" section below.

FOR FURTHER INFORMATION CONTACT:

Debra Hill, New Mexico Energy Streamlining Program Coordinator, at the above address and phone number, or by email at debra_hill@fws.gov.

SUPPLEMENTARY INFORMATION:**Background**

Recovery of endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of our endangered species program and the Act (16 U.S.C. 1531 *et seq.*). Recovery means improvement of the status of listed species to the point at which listing is no longer appropriate under the criteria set out in section 4(a)(1) of the Act. The Act requires the development of recovery plans for listed species, unless such a plan would not promote the conservation of a particular species.

Species History

Noel's amphipod (*Gammarus desperatus*), Koster's springsnail (*Juturnia kosteri*), Roswell springsnail (*Pyrgulopsis roswellensis*), and Pecos assimineae (*Assimineae pecos*) (four invertebrates) are associated with spring systems in desert-grasslands in southeastern New Mexico and southwestern Texas. In 2005, the four invertebrates were federally listed as endangered throughout their range, including the Roswell Basin aquifer system in southeastern New Mexico and the Toyah and Coyanosa Basins in southwest Texas. All four species are found on Bitter Lake National Wildlife Refuge in southern New Mexico. Pecos assimineae (*Assimineae pecos*) is also located at Diamond Y and East Sandia Spring in west Texas. Critical habitat was designated for the four species in 2011.

Water quantity decreases and associated spring flow declines are the primary threats to the four invertebrate species. Groundwater pumping in the

Roswell Basin, New Mexico, and in Pecos and Reeves Counties, Texas, has led to the drying of several springs, many of which are known to have harbored one or more of the four invertebrate species. Droughts and climate change can also affect springs and groundwater recharge through decreased flow, and indirectly through increased groundwater pumping. Threats to water quality are considered to be less significant than threats to water quantity, yet still important due to the species' extremely limited range and specialized tolerances that could be impacted by spills of high magnitude (degree to which the threats are affecting or can affect the species) or scope (how much of the species' range the threats are affecting or can affect). Sources of water quality degradation include, but are not limited to (1) contamination of ground water, (2) limited oil and gas activities, (3) hazardous materials spills from train derailments or other causes, (4) golden algae blooms, and (5) urbanization and stormwater runoff, all of which are expected to increase in the future. All four invertebrate species have a localized range, limited mobility, and fragmented habitat, meaning that any perturbation, either natural or anthropogenic, could eliminate many or all of the existing populations. Having a high number of individuals at a site provides little protection against extinction should their habitat become dry or contaminated. Limited mobility restricts their dispersal abilities and the fragmented (unconnected) habitat restricts gene flow among populations. Additional threats include invasive species, inadequate existing regulatory mechanisms, and climate change.

The overall strategy involves preserving, restoring, and managing their aquatic habitat, along with the water resources necessary to support resilient populations of these species and the ecosystems on which they depend. More specifically, the strategy is to: Ensure adequate water quantity; protect and improve water quality; protect and restore surface habitats; maintain and manage populations throughout each species' range, including conducting monitoring and research and establishing emergency programs necessary to maintain the species in captivity in case of catastrophic events; control invasive and predatory species; collaborate with partners to achieve conservation goals in balance with community water needs; and engage in community outreach to promote the importance of Bitter Lake National Wildlife Refuge and its diverse array of wildlife, including

sensitive, rare aquatic invertebrates, worthy of preserving. Employment of this strategy will lead to preservation of the array of habitat types used by the invertebrates, and protection of genetic diversity (representation) of each of the four species.

Recovery Plan Goals

The objective of an agency recovery plan is to provide a framework for the recovery of a species so that protection under the Act is no longer necessary. A recovery plan includes scientific information about the species and provides criteria and actions necessary for us to be able to reclassify the species to threatened status or remove it from the List. Recovery plans help guide our recovery efforts by describing actions we consider necessary for the species' conservation and by estimating time and costs for implementing needed recovery measures. This draft recovery plan identifies the following objectives to achieve the goal of species' recovery:

1. Securing the long-term survival of each species with the appropriate number, size, and distribution of populations;
2. Preserving sites that contain the necessary elements for each species' persistence, such as adequate water quantity and quality;
3. Reducing threats within management units so that the four invertebrate species' populations are capable of enduring stressors;
4. Conducting monitoring and research to understand population patterns, maintain genetic diversity, and identify new sites for species' introductions or repatriation; and
5. Working with others to develop long-term management plans and educational approaches that will protect the four invertebrates and inform the community about their habitat needs and ecological importance.

The draft recovery plan contains recovery criteria based on maintaining and increasing population numbers and habitat quality and quantity and mitigating significant threats to the species. Recovery actions to attain the recovery criteria focus on protecting populations, managing threats, maintaining habitat, monitoring progress, and building partnerships to facilitate recovery. When the recovery of the four species approaches these criteria, we will review the species' status and consider downlisting, and, ultimately, removal from the list of federally threatened and endangered species.

Request for Public Comments

Section 4(f) of the Act requires us to provide public notice and an opportunity for public review and comment during recovery plan development. It is also our policy to request peer review of recovery plans (July 1, 1994; 59 FR 34270). In an appendix to the approved recovery plan, we will summarize and respond to the issues raised by the public and peer reviewers. Substantive comments may or may not result in changes to the recovery plan; comments regarding recovery plan implementation will be forwarded as appropriate to Federal or other entities so that they can be taken into account during the course of implementing recovery actions. Responses to individual commenters will not be provided, but we will provide a summary of how we addressed substantive comments in an appendix to the approved recovery plan.

We invite written comments on the draft recovery plan. In particular, we are interested in additional information regarding the current threats to the species and the implementation of the recommended recovery actions.

Before we approve our final recovery plan, we will consider all comments we receive by the date specified in **DATES**, above. Methods of submitting comments are in the **ADDRESSES** section above.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Comments and materials we receive will be available, by appointment, for public inspection during normal business hours at our office (see **ADDRESSES**).

Notice of Public Meeting for the Utah Resource Advisory Council/Recreation Resource Advisory Council

AGENCY: Bureau of Land Management,
Interior.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Land Policy and Management Act, the Federal Advisory Committee Act, and the Federal Lands Recreation Enhancement Act, the U.S. Department of the Interior, Bureau of Land Management's (BLM) Utah Resource Advisory Council (RAC)/Recreation Resource Advisory Council (RRAC) will meet as indicated below.

DATES: The Utah RAC/RRAC will hold a public meeting on May 21 and 22, 2018. The group will meet on May 21 from 1 p.m. to 5:00 p.m. and on May 22 from 8 a.m. to 4:00 p.m.

ADDRESSES: The meeting will be held at the BLM Utah State Office, 440 West 200 South, Suite 500, Salt Lake City, Utah 84101. Written comments may be sent to the BLM Utah State Office, 440 West 200 South, Suite 500, Salt Lake City, Utah 84101.

FOR FURTHER INFORMATION CONTACT: Lola Bird, Public Affairs Specialist, BLM Utah State Office, 440 West 200 South, Suite 500, Salt Lake City, Utah 84101; phone (801) 539-4033; or email lbird@blm.gov. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1-800-877-8339 to leave a message or question for the above individual. The FRS is available 24 hours a day, seven days a week. Replies are provided during normal business hours.

SUPPLEMENTARY INFORMATION: Agenda topics include BLM updates from the State Director, fire dispatch study implementation, 2018 fire season outlook, updates for the planning process of Grand Staircase-Escalante and Bears Ears National Monuments, Watershed Protection Task Force, Mountain Accord, Washington County issues, Lake Powell pipeline project,

recreation fee proposals, and other planning updates.

A public comment period will take place on May 22 from 2:15 p.m. to 2:45 p.m., where the public may address the RAC/RRAC. Depending on the number of people who wish to speak, and the time available, the time for individual comments may be limited. Written comments may also be sent to the BLM Utah State Office at the address listed in the **ADDRESSES** section of this Notice.

The meeting is open to the public; however, transportation, lodging, and meals are the responsibility of the participating individuals.

Before including your address, phone number, email address, or other personal identifying information in your comments, please be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 43 CFR 1784.4-2

Edwin L. Roberson,
State Director.

National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.
ACTION: Notice.

SUMMARY: The National Park Service is soliciting comments on the significance of properties nominated before March 10, 2018, for listing or related actions in the National Register of Historic Places. **DATES:** Comments should be submitted by April 17, 2018.

ADDRESSES: Comments may be sent via U.S. Postal Service and all other carriers to the National Register of Historic Places, National Park Service, 1849 C St. NW, MS 7228, Washington, DC 20240.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places. Nominations for their consideration were received by the National Park Service before March 10, 2018. Pursuant to Section 60.13 of 36

CFR part 60, written comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.
