

Section 17.4(g) requires antenna structure owners to display the Antenna Structure Registration Number in a conspicuous place that is readily visible near the base of the antenna. This rule specifically requires that the Antenna Structure Number be displayed so that it is conspicuously visible and legible from the publicly accessible area nearest the base of the antenna structure along the publicly accessible roadway or path. Where an antenna structure is surrounded by a perimeter fence, or where the point of access includes an access gate, the Antenna Structure Registration Number should be posted on the perimeter fence or access gate. Where multiple antenna structures having separate Antenna Structure Registration Numbers are located within a single fenced area, the Antenna Structure Registration Numbers must be posted both on the perimeter fence or access gate and near the base of each antenna structure. If the base of the antenna structure has more than one point of access, the rule requires that the Antenna Structure Registration Number be posted so that it is visible at the publicly accessible area nearest each such point of access. The registration number is issued to identify antenna structure owners in order to enforce the Congressionally-mandated provisions related to the owners.

Sections 17.48 and 17.49 contain reporting and recordkeeping requirements. Section 17.48(a) requires that antenna structure owners immediately report outages of top steady burning lights or flashing antenna structure lights to the FAA, if not corrected within 30 minutes. Upon receipt of the outage notification, the FAA will issue a Notice to Airmen (NOTAM), which notifies aircraft of the outage. Consistent with FAA requirements, if a lighting outage cannot be repaired within the FAA's original NOTAM period, Section 17.48(a) further requires the antenna structure owner to notify the FAA of that fact and provide any needed updates to its estimated return-to-service date. The rule also requires antenna structure owners to continue to provide these updates to the FAA every NOTAM period until its lights are repaired.

Section 17.49 requires antenna structure owners to maintain a record of observed or otherwise known extinguishments or improper functioning of structure lights for two years and provide the records to the Commission upon request.
