**Synopsis**

1. *Introduction:* In this NPRM, the Commission proposes to streamline the process for reauthorizing television satellite stations when they are assigned or transferred in combination with their previously approved parent station. In accordance with Note 5 of section 73.3555 of the Commission's rules, authorized television satellite stations, which generally retransmit some or all of the programming of their parent station, are excepted from media ownership limits. In order for the exception to apply, a television station must obtain authorization as a satellite from the Commission, and it must be reauthorized as a satellite at the time of assignment or transfer of control. In response to the Public Notice launching the Commission's Modernization of Media Regulation Initiative, commenters assert that the reauthorization of the satellite exception can be costly and burdensome for both the station owner and the Commission. The Commission proposes to streamline the reauthorization process in order to eliminate potentially needless regulatory expense and delay. With this proceeding, the Commission continues its efforts to modernize its regulations and reduce unnecessary requirements
