BILLING CODE P

DEPARTMENT OF COMMERCE

Developing an Update to the National Space Weather Strategy

AGENCY: National Weather Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

ACTION: Notice of request for information.

SUMMARY: On behalf of the National Science and Technology Council (NSTC), Committee on Homeland and National Security, the National Weather Service (NWS) requests input from all interested parties on the development of an update to the National Space Weather Strategy (Strategy). Through this Request for Information (RFI), NWS seeks input from the public on ways to improve government coordination and on long-term guidance for Federal programs and activities to enhance national preparedness to space weather events, including geomagnetic disturbance (a natural source of electromagnetic pulse); promote American leadership in space weather research, technology, and innovation; and improve the safety and viability of human and robotic space activities. This RFI also seeks input on ways to enhance private sector engagement across these endeavors. The public input provided in response to this RFI will inform the NSTC as it works with Federal agencies and other stakeholders to develop the updated Strategy.

DATES: Responses are due by May 16, 2018.

ADDRESSES: You may submit comments by email to swxo2rplan@noaa.gov.

Please include "Space Weather Strategy Update" in the subject line of the message.

Instructions: Response to this RFI is voluntary. Respondents need not reply to all questions. Responses exceeding 2,000 words will not be considered. Clearly indicate which questions are being answered. Each individual or institution is requested to submit only one response. NWS may post responses to this RFI, without change, on a Federal website. NWS, therefore, requests that no business proprietary information, copyrighted information, or personally identifiable information be submitted in response to this RFI. Please note that the U.S. Government will not pay for response preparation or for the use of any information contained in the response.

FOR FURTHER INFORMATION CONTACT:

Michael Bonadonna, michael.bonadonna@noaa.gov, Office of the Federal Coordinator for Meteorology, (301) 686-0058.

SUPPLEMENTARY INFORMATION: Space weather, a natural source of electromagnetic pulse (EMP), can disrupt, degrade, or damage infrastructure and technology systems, including the electric power grid. Space weather can also blackout air traffic control and high frequency communications systems. Beyond terrestrial systems, space weather can affect satellite systems, interfere with GPS service, endanger the lives of humans in space, and delay the launch of space missions. This makes preparing for space weather events critical to national security, infrastructure services, space missions, and technology innovations (such as autonomous vehicles) that rely on communications systems and GPS for positioning, navigation, and timing services.

Preparing the Nation for space weather events will contribute to addressing many priorities identified in the 2017 National Security Strategy (NSS). The NSS identifies the need for America to lead in research, technology, and inventions through collaborations with allies and partners, leveraging private capital and expertise, and rapidly fielding innovations. Additionally, the NSS calls for promoting American resilience through improving risk management, building a culture of preparedness, and improving planning. Space weather phenomena, including EMP, can disrupt or damage technology and critical infrastructure systems, challenging national resilience and necessitating new and innovative approaches to addressing this hazard.
