

The FEA contains the staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

Abstract: The New Source Performance Standards (NSPS) for Calciners and Dryers in Mineral Industries (40 CFR part 60, subpart UUU) apply only to new calciners and dryers at mineral processing plants that either process or produce either any of the following minerals and their concentrates or any mixture of which the majority is any of the following minerals or a combination of these minerals: Alumina, ball clay, bentonite, diatomite, feldspar, fire clay, fuller's earth, gypsum, industrial sand, kaolin, lightweight aggregate, magnesium compounds, perlite, roofing granules, talc, titanium dioxide, and vermiculite. Particulate matter (PM) is the pollutant regulated under this subpart. Feed and product conveyors are not considered part of the affected facility. Facilities subject to the NSPS for Metallic Mineral Processing Plants (40 CFR part 60, subpart LL) are not subject to these standards. There are additional processes and process units at mineral processing plants listed at Section 60.730(b) which are not subject to the provisions of this Subpart. New

facilities include those that commenced construction, modification or reconstruction after the date of proposal. In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form Numbers: None.

Respondents/affected entities:

Owners and operators of calciners and dryers at mineral processing plants.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart UUU).

Estimated number of respondents: 167 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 6,630 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$805,000 (per year), includes \$109,000 in either annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a small increase in the total estimated burden currently identified in the OMB Inventory of Approved Burdens. The adjustment in the burden occurred because this ICR assumes all existing respondents will have to familiarize with the regulatory requirements each year. Further, there is an increase of one response due to a correction. The previous ICR did not account for the notification of operational/physical change in calculating the number of responses.

Courtney Kerwin,

Director, Regulatory Support Division.

ACTION: Notice of availability; request for public comments.

SUMMARY: In accordance with the Oil Pollution Act of 1990 (OPA) and the National Environmental Policy Act (NEPA), the Federal and State natural resource trustee agencies for the Louisiana Trustee Implementation Group (Louisiana TIG) prepared a Draft Restoration Plan and Environmental Assessment #4: Nutrient Reduction (Nonpoint Source) and Recreational Use (Draft RP/EA). The Draft RP/EA describes and proposes restoration project alternatives considered by the Louisiana TIG to improve water quality by reducing nutrients from nonpoint sources and to compensate for recreational use services lost as a result of the *Deepwater Horizon* oil spill. The Louisiana TIG evaluated these alternatives under criteria set forth in the OPA natural resource damage assessment (NRDA) regulations, and also evaluated the environmental consequences of the restoration alternatives in accordance with NEPA. The proposed projects are consistent with the restoration alternatives selected in the *Deepwater Horizon* oil spill Final Programmatic Damage Assessment and Restoration Plan/Programmatic Environmental Impact Statement (PDARP/PEIS). The purpose of this notice is to inform the public of the availability of the Draft RP/EA and to seek public comments on the document.

DATES: The Louisiana TIG will consider public comments received on or before May 21, 2018.
