Needs and Uses: On July 14, 2017, the Federal Communications Commission ("Commission") released a First Report and Order titled, "In the Matter of Amendment of Parts 0, 1, 2, 15 and 18 of the Commission's Rules Regarding Authorization of Radiofrequency Equipment," ET Docket No. 15-170 (FCC 17-93). In the First Report and Order, the Commission discontinued use of the "Statement Regarding the Importation of Radio Frequency Devices Capable of Harmful Interference," (FCC Form 740) and eliminated 47 CFR 2.1205 and 2.1203(b), thus removing the Form 740 filing requirements. The agency concluded that there was no evidence indicating that the Form 740 filing process provided a substantial deterrent to illegal importation of RF devices, and that the existing filing requirement creates large burdens in light of the growth in the number and type of RF devices being imported, and that there is now a wider availability of product and manufacturer information, including that available to the FCC from the Custom and Border Protection's (CBP) database. The Form 740 was

approved under OMB Control No. 3060-0059 and was under the purview of the Commission's Office of Engineering & Technology (OET).

The purposes of the revision of OMB Control No. 3060-1063 are to reflect a slight decrease in the number of satellite operators and/or GMPCS equipment manufacturers and changes resulting from the elimination of Form 740. Specifically, the number of respondents changed from 19 to 17 due to a decrease in the number of satellite operators and/or GMPCS equipment manufacturers. As a result of the elimination of the Form 740, the total annual burden hours changed from 684 to 595 and the total annual costs decreased from \$13,110 to zero.

The purpose of this information collection is to maintain OMB approval of a certification requirement for portable GMPCS transceivers to prevent interference, reduce radio-frequency ("RF") radiation exposure risk, and make regulatory treatment of portable GMPCS transceivers consistent with treatment of similar terrestrial wireless devices, such as cellular phones.

The Commission is requiring that applicants obtain authorization for the equipment by submitting an application and exhibits, including test data. If the Commission did not obtain such information, it would not be able to ascertain whether the equipment meets the FCC's technical standards for operation in the United States. Furthermore, the data is required to ensure that the equipment will not cause catastrophic interference to other telecommunications services that may impact the health and safety of American citizens.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.
