SUPPLEMENTARY INFORMATION:

I. Abstract

The International Trade Administration provides a multitude of international trade related programs to help U.S. businesses. These programs include information products, services, and trade events. To accomplish its mission effectively, ITA needs ongoing feedback on its programs. This information collection item allows ITA to solicit clients' opinions about the use of ITA products, services, and trade events. To promote optimal use and provide focused and effective improvements to ITA programs, we are requesting approval for this clearance package; including: Use of Comment Cards (*i.e.* transactional-based surveys) to collect feedback immediately after ITA assistance is provided to clients; use of annual surveys (*i.e.* relationship-based surveys) to gauge overall satisfaction, impact and needs for clients with ITA assistance provided over a period time; use of multiple data collection methods (*i.e.* web-enabled surveys sent via email, telephone interviews, automated telephone surveys, and in-person surveys via mobile devices/laptops/tablets at trade events/shows) to enable clients to conveniently respond to requests for feedback; and a forecast of burden hours. Without this information, ITA is unable to systematically determine the actual and relative levels of performance for its programs and products/services and to provide clear, actionable insights for managerial intervention. This information will be used for program evaluation and improvement, strategic planning, allocation of resources and stakeholder reporting.

II. Method of Collection

The International Trade Administration is seeking approval for the following data collection methods to provide flexibility in conducting customer satisfaction surveys and to reduce the burden on respondents: (1) An email message delivering a hot link to a web enabled survey with an email reminder sent if the client does not respond to the survey within two weeks; (2) a telephone survey/interview; and (3) a web-enabled survey conducted in-person at trade shows/events via a laptop, tablet or mobile phone so participants can immediately respond without having to provide their email address.
