Abstract: In order for a State to obtain final authorization for a State hazardous waste program or to revise its previously authorized program, it must submit an official application to the EPA Regional office for approval. The purpose of the application is to enable the EPA to properly determine whether the State's program meets the requirements of § 3006 of RCRA. A State with an approved program may voluntarily transfer program responsibilities to EPA by notifying the EPA of the proposed transfer, as required by section 271.23. Further, the EPA may withdraw a State's authorized program under section 271.23.

State program revision may be necessary when the controlling Federal or State statutory or regulatory authority is modified or supplemented. In the event that the State is revising its program by adopting new Federal requirements, the State shall prepare and submit modified revisions of the program description, Attorney General's statement, Memorandum of Agreement, or such other documents as the EPA determines to be necessary. The State shall inform the EPA of any proposed modifications to its basic statutory or regulatory authority in accordance with section 271.21. If a State is proposing to transfer all or any part of any program from the approved State agency to any other agency, it must notify the EPA in accordance with section 271.21 and submit revised organizational charts as required under section 271.6, in accordance with section 271.21. These paperwork requirements are mandatory under § 3006(a). The EPA will use the information submitted by the State in

order to determine whether the State's program meets the statutory and regulatory requirements for authorization.

Abstract: Section 3004 of the Resource Conservation and Recovery Act (RCRA), as amended, requires that EPA develop standards for hazardous waste treatment, storage, and disposal as may be necessary to protect human health and the environment. Subsections 3004(d), (e), and (g) require EPA to promulgate regulations that prohibit the land disposal of hazardous waste unless it meets specified treatment standards described in subsection 3004(m).

The regulations implementing these requirements are codified in the Code of Federal Regulations (CFR) Title 40, Part 268. EPA requires that facilities maintain the data outlined in this ICR so that the Agency can ensure that land disposed waste meets the treatment standards. EPA strongly believes that the recordkeeping requirements are necessary for the agency to fulfill its congressional mandate to protect human health and the environment.

SUPPLEMENTARY INFORMATION: EPA is exploring opportunities to streamline and modernize its existing fuels regulations under 40 CFR part 80 to update EPA's existing gasoline, diesel, and other fuels regulations to help reduce burden for stakeholders as well as EPA, while improving overall compliance assurance and maintaining environmental performance. EPA intends to achieve this goal in streamlining the existing fuels regulations by: Deleting expired provisions, eliminating redundant compliance provisions (e.g., duplicative registration requirements that are required by every EPA fuels program), and replacing them with a single set of provisions and definitions that would apply across all gasoline, diesel, and other fuels programs currently under 40 CFR part 80.

The workshop will provide the opportunity for EPA to update stakeholders on its progress regarding this streamlining of the existing fuels regulations, and for stakeholders to provide initial feedback as EPA develops its proposed rule.

Director, Office of Transportation and Air Quality, Office of Air and Radiation.
