

serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed so that they can obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the "Contact Us" link located on the NRC's public website at <http://www.nrc.gov/site-help/e-submittals.html>, by email to MSHD.Resource@nrc.gov, or by a toll-free call at 1-866-672-7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., Eastern Time, Monday through Friday, excluding government holidays.

Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) First class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, 11555 Rockville Pike, Rockville, Maryland 20852, Attention: Rulemaking and Adjudications Staff. Participants filing adjudicatory documents in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the reason for granting the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket which is available to the public at <https://adams.nrc.gov/ehd>, unless excluded pursuant to an order of the Commission or the presiding officer. If you do not have an NRC-issued digital ID certificate as described above, click cancel when the link requests certificates and you

will be automatically directed to the NRC's electronic hearing dockets where you will be able to access any publicly available documents in a particular hearing docket.

Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or personal phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. For example, in some instances, individuals provide home addresses in order to demonstrate proximity to a facility or site. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

The Commission will issue a notice or order granting or denying a hearing request or intervention petition, designating the issues for any hearing that will be held and designating the Presiding Officer. A notice granting a hearing will be published in the **Federal Register** and served on the parties to the hearing.

For further details with respect to this application, see the application dated March 21, 2018 (ADAMS Accession No. ML18086B504).

Kuyler, Assistant General Counsel, Westinghouse Electric Company at 301-230-4884 for the purpose of negotiating a confidentiality agreement or a proposed protective order with the applicant. The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <http://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should

inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Additional Information

The NRC is issuing for public comment a DG in the NRC’s “Regulatory Guide” series. This series was developed to describe and make available to the public information regarding methods that are acceptable to the NRC staff for implementing specific parts of the NRC’s regulations, techniques that the staff uses in evaluating specific issues or postulated events, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide, entitled, “Standard Format and Content of Physical Security Plans, Training and Qualifications Plans and Safeguards Contingency Plans for Nuclear Power Plants,” is temporarily identified by its task number, DG–5048. DG–5048 is proposed Revision 2 of RG 5.54, “Standard Format and Content of Physical Security Plans, Training and Qualifications Plans and Safeguards Contingency Plans for Nuclear Power Plants” (ADAMS Accession No. ML17124A490). This revision of the guide (Revision 2) retitles the guide and consolidates, enhances, and clarifies previous staff guidance for the development of licensee site-specific physical security plans found in NUREG–0908, “Acceptance Criteria for the Evaluation of Nuclear Power Reactor Security Plans” (ADAMS Accession No. ML18128A239), training and qualification plans, and safeguards contingency plans. This revision to the regulatory guide includes clarifications provided by the staff in the Security Frequently Asked Questions after Revision 1 was published, and contains a wide variety of editorial changes to the overall Revision 1 content. In addition, this revision of the guide provides licensees with guidance for developing security plans and safeguards contingency plans for title 10 of the *Code of Federal Regulations* (10 CFR), part 72 licensees for independent spent fuel storage facilities.

I. Backfitting and Issue Finality

DG–5048 describes a method that the staff of the NRC considers acceptable for use by nuclear power plant licensees in meeting the requirements for the

standard format and content for licensee physical security, training and qualification, and safeguards contingency plans and provides general guidance for the identification, description, and level of detail that licensees should provide, including site-specific conditions, in a comprehensive security plan. Issuance of this DG, if finalized, would not constitute backfitting as defined in 10 CFR 50.109 (the Backfit Rule) and would not otherwise be inconsistent with the issue finality provisions in 10 CFR part 52. As discussed in the “Implementation” section of this DG, the NRC has no current intention to impose this guide, if finalized, on holders of current operating licenses or combined licenses.

This DG, if finalized, may be applied to applications for operating licenses and combined licenses docketed by the NRC as of the date of issuance of the final regulatory guide, as well as future applications submitted after the issuance of the regulatory guide. Such action would not constitute backfitting as defined in the Backfit Rule or be otherwise inconsistent with the applicable issue finality provisions in 10 CFR part 52, inasmuch as such applicants or potential applicants are not within the scope of entities protected by the Backfit Rule or the relevant issue finality provisions in part 52.

Neither section 50.109 nor the issue finality provisions under 10 CFR part 52 were intended to apply to NRC actions that change the expectations of current and future applicants. However, the issue finality provisions of part 52 may apply when an applicant references a part 52 license or other NRC regulatory approval. Nevertheless, the scope of issue finality provided extends only to the matters resolved in the license or regulatory approval. Early site permits, design certification rules, and standard design approvals typically do not address or resolve compliance with operational programs such as the security requirements in 10 CFR part 73. Therefore, applicants referencing an early site permit, design certification rule, or standard design approval may be asked to follow the guidance in this draft regulatory guide, if finalized, or to provide an equivalent alternative process that demonstrates compliance with the underlying NRC regulatory requirements.
