The FERC-65 must be submitted within 30 days of becoming a holding company.¹ While the Commission does not require the information to be reported in a specific format, the filing needs to consist of the name of the holding company, the name of public utilities, the name of natural gas companies in the holding company system, and the names of service companies. In addition, the Commission requires the filing to include the names of special-purpose subsidiaries (which provide non-power goods and services) and the names of all affiliates and subsidiaries (and their corporate interrelationship) to each other. FERC-65A (Exemption Notification of Holding Company Status)

While noting the previously outlined requirements of the FERC-65, the Commission has allowed for an exemption from the requirement of providing the Commission with a FERC-65 if the books, accounts, memoranda, and other records of any person are not relevant to the jurisdictional rates of a public utility or natural gas company; or if any class of transactions is not relevant to the jurisdictional rates of a public utility or natural gas company. Persons seeking this exemption file the FERC-65A, which must include a form of notice suitable for publication in the **Federal Register**. Those who file a FERC-65A in good faith will have a temporary exemption upon filing, after 60 days if the Commission has taken no action, the exemption will be deemed granted. Commission regulations within 18 CFR 366.3 describe the criteria in more specificity.

1. FERC-65B (Waiver Notification of Holding Company Status)

If an entity meets the requirements in 18 CFR 366.3(c), they may file a FERC-65B waiver notification pursuant to the procedures outlined in 18 CFR 366.4. Specifically, the Commission waives the requirement of providing it with a FERC-65 for any holding company with respect to one or more of the following: (1) Single-state holding company systems; (2) holding companies that own generating facilities that total 100 MW or less in size and are used fundamentally for their own load or for sales to affiliated end-users; or (3) investors in independent transmission-only companies. Filings may be made in hardcopy or electronically through the Commission's website.

Type of Respondent: Public utility companies, natural gas companies, electric wholesale generators, foreign utility holding companies.

Estimate of Annual Burden:² The Commission estimates the annual public reporting burden for the information collection as:

² Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. Refer to 5 CFR 1320.3 for additional information.

Title: FERC-725V, Mandatory Reliability Standards: COM Reliability Standards.

OMB Control No.: 1902-0277.

Type of Request: Three-year extension of the FERC-725V information collection requirements with no changes to the current reporting requirements.

Abstract: On August 15, 2016, the North American Electric Reliability Corporation (NERC) filed a petition for Commission approval, pursuant to section 215(d)(1) of the Federal Power Act (“FPA”) ⁴ and Section 39.5 ⁵ of the Federal Energy Regulatory Commission’s regulations, for Reliability Standard COM-001-3 (Communications), the associated Implementation Plan, retirement of currently-effective Reliability Standard COM-001-2.1, and Violation Risk Factors (“VRFs”) and Violation Severity Levels (“VSLs”) associated with new Requirements R12 and R13 in Reliability Standard COM-001-3.

Reliability Standard COM-001-3 reflects revisions developed under Project 2015-07 Internal Communications Capabilities, in compliance with the Commission’s directive in Order No. 888 that NERC “develop modifications to COM-001-2, or develop a new standard, to address the Commission’s concerns regarding ensuring the adequacy of internal communications capability whenever internal communications could directly affect the reliability opera.

Reliability Standards COM-001-2 and COM-002-4 do not require responsible entities to file information with the Commission. COM-001-2 requires that transmission operators, balancing authorities, reliability coordinators, distribution providers, and generator operators must maintain documentation of Interpersonal Communication capability and designation of Alternate Interpersonal Communication, as well

as evidence of testing of the Alternate Interpersonal Communication facilities. COM-002-4 requires balancing authorities, distribution providers, reliability coordinators, transmission operators, and generator operators to develop and maintain documented communication protocols, and to be able to provide evidence of training on the protocols and of their annual assessment of the protocols. Additionally, all applicable entities (balancing authorities, reliability coordinators, transmission operators, generator operators, and distribution providers) must be able to provide evidence of three-part communication when issuing or receiving an Operating Instruction during an Emergency.

Type of Respondents: Public utilities.

*Estimate of Annual Burden:*⁶ The Commission estimates the annual public reporting burden for the information collection as:

³ The estimates for cost per response are derived using the following formula: 2017 Average Burden Hours per Response * \$76.50 per Hour = Average Cost per Response. The hourly cost figure of \$76.50 is the average FERC employee wage plus benefits.

We assume for FERC-65, FERC-65A and FERC-65B that respondents earn at a similar rate.

persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, reference 5 Code of Federal Regulations 1320.3.
