[Docket No. RM93-11-000]

Notice of Annual Change in the Producer Price Index for Finished Goods; Revisions to Oil Pipeline Regulations Pursuant to the Energy Policy Act of 1992

The Commission's regulations include a methodology for oil pipelines to change their rates through use of an index system that establishes ceiling levels for such rates. The Commission bases the index system, found at 18 CFR 342.3, on the annual change in the Producer Price Index for Finished Goods (PPI-FG), plus one point two three percent (PPI-FG + 1.23). The Commission determined in an *Order Establishing Index Level*,¹ issued December 17, 2015, that PPI-FG + 1.23 is the appropriate oil pricing index factor for pipelines to use for the five-year period commencing July 1, 2016.

The regulations provide that the Commission will publish annually, an index figure reflecting the final change in the PPI-FG, after the Bureau of Labor Statistics publishes the final PPI-FG in May of each calendar year. The annual

average PPI-FG index figures were 191.9 for 2016 and 198.0 for 2017.² Thus, the percent change (expressed as a decimal) in the annual average PPI-FG from 2016 to 2017, plus 1.23 percent, is positive 0.044087.³ Oil pipelines must multiply their July 1, 2017, through June 30, 2018, index ceiling levels by positive 1.044087⁴ to compute their index ceiling levels for July 1, 2018, through June 30, 2019, in accordance with 18 CFR 342.3(d). For guidance in calculating the ceiling levels for each 12 month period beginning January 1, 1995,⁵ see *Explorer Pipeline Company*, 71 FERC 61,416 at n.6 (1995).

In addition to publishing the full text of this Notice in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print this Notice via the internet through FERC's Home Page (<http://www.ferc.gov>) and in FERC's Public Reference Room during normal business hours (8:30 a.m. to 5:00 p.m. Eastern time) at 888 First Street NE, Room 2A, Washington, DC 20426. Email the Public Reference Room at public.referenceroom@ferc.gov.

² Bureau of Labor Statistics (BLS) publishes the final figure in mid-May of each year. This figure is publicly available from the Division of Industrial Prices and Price Indexes of the BLS, at 202-691-7705, and in print in August in Table 1 of the annual data supplement to the BLS publication *Producer Price Indexes* via the internet at <http://www.bls.gov/ppi/home.htm>. To obtain the BLS data, scroll down to PPI Databases and click on Top Picks of the Commodity Data including headline FD-ID indexes (Producer Price Index—PPI). At the next screen, under the heading PPI Commodity Data, select the box, Finished goods—WPUFD49207, then scroll to the bottom of this screen and click on Retrieve data.

³ $[198.0 - 191.9] / 191.9 = 0.031787 + 0.0123 = + 0.044087$.

⁴ $1 + 0.044087 = 1.044087$.

SUPPLEMENTARY INFORMATION:

Title: FERC-537 (Gas Pipeline Certificates: Construction, Acquisition, and Abandonment).

OMB Control No.: 1902-0060.

Type of Request: Three-year extension of the FERC-537 information collection requirements with no changes to the current reporting requirements.

Abstract: The FERC-537 information collection requires natural gas companies to file the necessary information with FERC in order for the Commission to determine if the requested certificate should be authorized. Certain self-implementing construction and abandonment programs do not require the filing of applications. However, those types of programs do require the filing of annual reports, so many less significant actions can be reported in a single filing/

response and less detail would be required.

The data required to be submitted in a normal certificate filing consists of identification of the company and responsible officials, factors considered in the location of the facilities and the impact on the area for environmental considerations. Also to be submitted are the following, as applicable to the specific request:

- Flow diagrams showing the design capacity for engineering design verification and safety determination;
- Cost of proposed facilities, plans for financing, and estimated revenues and expenses related to the proposed facility for accounting and financial evaluation.
- Existing and proposed storage capacity and pressures and reservoir engineering studies for requests to increase storage capacity;
- An affidavit showing the consent of existing customers for abandonment of service requests.

Additionally, requests for an increase of pipeline capacity must include a statement that demonstrates compliance with the Commission's Certificate Policy Statement by making a showing that the cost of the expansion will not be subsidized by existing customers and that there will not be adverse economic impacts to existing customers, competing pipelines or their customers, nor to landowners and to surrounding communities.

Type of Respondents: Natural gas companies.

*Estimate of Annual Burden:*¹ The Commission estimates the annual public reporting burden for the information collection as:
