

Federal Advisory Committee Act (5 U.S.C. App. 2), announcement is made of an Agency for Healthcare Research and Quality (AHRQ) Special Emphasis Panel (SEP) meeting on AHRQ–HS–18–001, “Patient Safety Learning Laboratories: Pursuing Safety in Diagnosis and Treatment at the Intersection of Design, Systems Engineering, and Health Services Research (R18).”

A Special Emphasis Panel is a group of experts in fields related to health care research who are invited by the Agency for Healthcare Research and Quality (AHRQ), and agree to be available, to conduct on an as needed basis, scientific reviews of applications for AHRQ support. Individual members of the Panel do not attend regularly-scheduled meetings and do not serve for fixed terms or a long period of time. Rather, they are asked to participate in particular review meetings which require their type of expertise.

Each SEP meeting will commence in open session before closing to the public for the duration of the meeting. The SEP meeting referenced above will be closed to the public in accordance with the provisions set forth in 5 U.S.C. App. 2, section 10(d), 5 U.S.C. 552b(c)(4), and 5 U.S.C. 552b(c)(6). Grant applications for the “AHRQ–HS–18–001”, “Patient Safety Learning Laboratories: Pursuing Safety in Diagnosis and Treatment at the Intersection of Design, Systems Engineering, and Health Services Research (R18)” is to be reviewed and discussed at this meeting. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Francis D. Chesley, Jr.,
Acting Deputy Director.

BILLING CODE 4160–90–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Agency for Healthcare Research and Quality, HHS.

ACTION: Notice.

SUMMARY: This notice announces the intention of the Agency for Healthcare Research and Quality (AHRQ) to request that the Office of Management and Budget (OMB) approve the proposed information collection project “*Medical Expenditure Panel Survey (MEPS) Household Component and the MEPS Medical Provider Component.*”

DATES: Comments on this notice must be received by August 3, 2018.

ADDRESSES: Written comments should be submitted to: Doris Lefkowitz, Reports Clearance Officer, AHRQ, by email at doris.lefkowitz@AHRQ.hhs.gov.

Copies of the proposed collection plans, data collection instruments, and specific details on the estimated burden can be obtained from the AHRQ Reports Clearance Officer.

FOR FURTHER INFORMATION CONTACT: Doris Lefkowitz, AHRQ Reports Clearance Officer, (301) 427–1477, or by emails at doris.lefkowitz@AHRQ.hhs.gov.

SUPPLEMENTARY INFORMATION:

Proposed Project

Medical Expenditure Panel Survey (MEPS) Household Component (HC)

In accordance with the Paperwork Reduction Act, 44 U.S.C. 3501–3521, AHRQ invites the public to comment on this proposed information collection. For over thirty years, results from the MEPS and its predecessor surveys (the 1977 National Medical Care Expenditure Survey, the 1980 National Medical Care Utilization and Expenditure Survey and the 1987 National Medical Expenditure Survey) have been used by OMB, DHHS, Congress and a wide number of health services researchers to analyze health care use, expenses and health policy.

Major changes continue to take place in the health care delivery system. The MEPS is needed to provide information about the current state of the health care system as well as to track changes over time. The MEPS permits annual estimates of use of health care and expenditures and sources of payment for that health care. It also permits tracking individual change in employment, income, health insurance and health status over two years. The use of the NHIS as a sampling frame expands the MEPS analytic capacity by providing another data point for comparisons over time.

Households selected for participation in the MEPS–HC are interviewed five times in person. These rounds of interviewing are spaced about 5 months apart. The interview will take place with a family respondent who will

report for him/herself and for other family members.

The MEPS–HC has the following goal:

- To provide nationally representative estimates for the U.S. civilian noninstitutionalized population for:
- health care use, expenditures, sources of payment
- health insurance coverage

To achieve the goals of the MEPS–HC the following data collections are implemented:

1. Household Component Core Instrument.

The core instrument collects data about persons in sample households. Topical areas asked in each round of interviewing include priority condition enumeration, health status, health care utilization including prescribed medicines, expenses and payments, employment, and health insurance. Other topical areas that are asked only once a year include access to care, income, assets, satisfaction with providers, and children’s health. While many of the questions are asked about the entire reporting unit (RU), which is typically a family, only one person normally provides this information. All sections of the current core instrument are available on the AHRQ website at http://meps.ahrq.gov/mepsweb/survey_comp/survey_questionnaires.jsp.

2. Adult Self-Administered Questionnaire.

A brief self-administered questionnaire (SAQ) will be used to collect self-reported data (rather than through household proxy) on health opinions and satisfaction with health care, and information on health status, preventive care and health care quality measures for adults 18 and older. This questionnaire is revised from the previous OMB clearance and received clearance on May 9, 2018.

3. **Veteran SAQ.** MEPS includes a new self-administered questionnaire for spring of 2019 data collection targeting the veteran population. The questionnaire asks questions in the following domains of interest: if a veteran is eligible for VA health care; if a Veteran is enrolled in VA health care; coordination of care in and out of the VA health care system, services provided to Veterans in and out of the VA health care system, and VA eligibility priority groups, for Veterans enrolled in VA health care and for Veterans eligible for VA health care. To assist in the correct identification of priority groups, the questionnaire may also include items assessing the following: presence of service-connected disability; service-connected disability rating; presence of presumptive-conditions; timing and era of active duty; and VA receipt of disability compensation benefits. AHRQ worked with the Veterans Health Administration to develop the questionnaire content.

4. **Diabetes Care SAQ.** There is no change in this instrument. A brief self-administered paper-and-pencil questionnaire on the quality of diabetes care is administered once a year (during rounds 3 and 5) to persons identified as having diabetes. Included are questions about the number of times the respondent reported having a hemoglobin A1c blood test, whether the respondent

reported having his or her feet checked for sores or irritations, whether the respondent reported having an eye exam in which the pupils were dilated, the last time the respondent had his or her blood cholesterol checked and whether the diabetes has caused kidney or eye problems. Respondents are also asked if their diabetes is being treated with diet, oral medications or insulin. This questionnaire is unchanged from the previous OMB clearance.

5. Authorization forms for the MEPS-MPC Provider and Pharmacy Survey. There is no change in this instrument. As in previous panels of the MEPS, we will ask respondents for authorization to obtain supplemental information from their medical providers (hospitals, physicians, home health agencies and institutions) and pharmacies.

6. MEPS Validation Interview. There is no change in this instrument. Each interviewer is required to have at least 15 percent of his/her caseload validated to insure that the computer assisted personal interview (CAPI) questionnaire content was asked appropriately and procedures followed, for example the use of show cards. Validation flags are set programmatically for cases pre-selected by data processing staff before each round of interviewing. Home office and field management may also request that other cases be validated throughout the field period. When an interviewer fails a validation their work is subject to 100 percent validation. Additionally, any case completed in less than 30 minutes is validated. A validation abstract form containing selected data collected in the CAPI interview is generated and used by the validator to guide the validation interview.

Medical Expenditure Panel Survey (MEPS) Medical Provider Component (MPC)

The MEPS-MPC will contact medical providers (hospitals, physicians, home health agencies and institutions) identified by household respondents in the MEPS-HC as sources of medical care for the time period covered by the interview, and all pharmacies providing prescription drugs to household members during the covered time period. The MEPS-MPC is not designed to yield national estimates as a stand-alone survey. The sample is designed to target the types of individuals and providers for whom household reported expenditure data was expected to be insufficient. For example, Medicaid enrollees are targeted for inclusion in the MEPS-MPC because this group is expected to have limited information about payments for their medical care.

The MEPS-MPC collects event level data about medical care received by sampled persons during the relevant time period. The data collected from medical providers include:

- Dates on which medical encounters during the reference period occurred
- Data on the medical content of each encounter, including ICD-10 codes

- Data on the charges associated with each encounter, the sources paying for the medical care—including the patient/family, public sources, and private insurance, and amounts paid by each source

Data collected from pharmacies include:

- Date of prescription fill
- National drug code (NDC) or prescription name, strength and form
- Quantity
- Payments, by source

The MEPS-MPC has the following goal:

- To serve as an imputation source for and to supplement/replace household reported expenditure and source of payment information. This data will supplement, replace and verify information provided by household respondents about the charges, payments, and sources of payment associated with specific health care encounters.

To achieve the goal of the MEPS-MPC the following data collections are implemented:

1. MPC Contact Guide/Screening Call.

There is no change in this instrument. An initial screening call is placed to determine the type of facility, whether the practice or facility is in scope for the MEPS-MPC, the appropriate MEPS-MPC respondent and some details about the organization and availability of medical records and billing at the practice/facility. All hospitals, physician offices, home health agencies, institutions and pharmacies are screened by telephone. A unique screening instrument is used for each of these seven provider types in the MEPS-MPC, except for the two home care provider types which use the same screening form.

2. Home Care Provider Questionnaire for Health Care Providers. There is no change in this instrument. This questionnaire is used to collect data from home health care agencies which provide medical care services to household respondents. Information collected includes type of personnel providing care, hours or visits provided per month, and the charges and payments for services received. Some HMOs may be included in this provider type.

3. Home Care Provider Questionnaire for Non-Health Care Providers. There is no change in this instrument. This questionnaire is used to collect information about services provided in the home by non-health care workers to household respondents because of a medical condition; for example, cleaning or yard work, transportation, shopping, or child care.

4. Medical Event Questionnaire for Office-Based Providers. There is no change in this instrument. This questionnaire is for office-based physicians, including doctors of medicine (MDs) and osteopathy (DOs), as well as providers practicing under the direction or supervision of an MD or DO (e.g., physician assistants and nurse practitioners working in clinics). Providers of care in private offices as well as staff model HMOs are included.

5. Medical Event Questionnaire for Separately Billing Doctors. There is no

change in this instrument. This questionnaire collects information from physicians identified by hospitals (during the Hospital Event data collection) as providing care to sampled persons during the course of inpatient, outpatient department or emergency room care, but who bill separately from the hospital.

6. Hospital Event Questionnaire. There is no change in this instrument. This questionnaire is used to collect information about hospital events, including inpatient stays, outpatient department, and emergency room visits. Hospital data are collected not only from the billing department, but from medical records and administrative records departments as well. Medical records departments are contacted to determine the names of all the doctors who treated the patient during a stay or visit. In many cases, the hospital administrative office also has to be contacted to determine whether the doctors identified by medical records billed separately from the hospital; doctors that do bill separately from the hospital will be contacted as part of the Medical Event Questionnaire for Separately Billing Doctors. HMOs are included in this provider type.

7. Institutions Event Questionnaire. There is no change in this instrument. This questionnaire is used to collect information about institution events, including nursing homes, rehabilitation facilities and skilled nursing facilities. Institution data are collected not only from the billing department, but from medical records and administrative records departments as well. Medical records departments are contacted to determine the names of all the doctors who treated the patient during a stay. In many cases, the institution's administrative office also has to be contacted to determine whether the doctors identified by medical records billed separately from the institution itself. Some HMOs may be included in this provider type.

8. Pharmacy Data Collection

Questionnaire. There is no change in this instrument. This questionnaire requests the NDC and when that is not available the prescription name, strength and form as well as the date prescription was filled, payments by source, the quantity, and person for whom the prescription was filled. When the NDC is available, we do not ask for prescription name, strength or form because that information is embedded in the NDC; this reduces burden on the respondent. Most pharmacies have the requested information available in electronic format and respond by providing a computer generated printout of the patient's prescription information. If the computerized form is unavailable, the pharmacy can report their data to a telephone interviewer. Pharmacies are also able to provide a CD-ROM with the requested information if that is preferred. HMOs are included in this provider type.

Dentists, optometrists, psychologists, podiatrists, chiropractors, and others not providing care under the supervision of a MD or DO are considered out of scope for the MEPS-MPC.

The MEPS-HC and MEPS-MPC are being conducted by AHRQ through its

contractors, Westat and RTI International, pursuant to AHRQ's statutory authority to conduct and support research on health care and on systems for the delivery of such care, including activities with respect to the cost and use of health care services and with respect to health statistics and surveys. 42 U.S.C. 299a(a)(3) and (8); 42 U.S.C. 299b-2.

Estimated Annual Respondent Burden

Exhibit 1 shows the estimated annualized burden hours for the respondents' time to participate in the MEPS-HC and the MEPS-MPC

The MEPS-HC Core Interview will be completed by 13,338 * (see note below Exhibit 1) "family level" respondents, also referred to as RU respondents. Since the MEPS-HC consists of 5 rounds of interviewing covering a full two years of data, the annual average number of responses per respondent is 2.5 responses per year. The MEPS-HC core requires an average response time of 92 minutes to administer. The Adult Female SAQ will be completed once a year by each female person in the RU that is 18 years old and older, an estimated 12,984 persons. The Adult Male SAQ will be completed once a year by each male person in the RU that is 18 years old and older, an estimated 11,985 persons. The Adult SAQs each require an average of 7 minutes to

complete. The Diabetes care SAQ will be completed once a year by each person in the RU identified as having diabetes, an estimated 2,072 persons, and takes about 3 minutes to complete. The Veteran SAQ will be completed once by each in-scope person who is a veteran of the U.S. military identified in the Round 1, Panel 23 interview, an estimated 1,350 persons. The Veteran SAQ requires an average of 15 minutes to complete. The authorization form for the MEPS-MPC Provider Survey will be completed once for each medical provider seen by any RU member. The 12,804 RUs in the MEPS-HC will complete an average of 5.4 authorization forms, which require about 3 minutes each to complete. The authorization form for the MEPS-MPC Pharmacy Survey will be completed once for each pharmacy for any RU member who has obtained a prescription medication. RUs will complete an average of 3.1 forms, which take about 3 minutes to complete. About one third of all interviewed RUs will complete a validation interview as part of the MEPS-HC quality control, which takes an average of 5 minutes to complete. The total annual burden hours for the MEPS-HC are estimated to be 60,278 hours.

All medical providers and pharmacies included in the MEPS-MPC will receive a screening call and the MEPS-MPC

uses 7 different questionnaires; 6 for medical providers and 1 for pharmacies. Each questionnaire is relatively short and requires 2 to 19 minutes to complete. The total annual burden hours for the MEPS-MPC are estimated to be 17,388 hours. The total annual burden for the MEPS-HC and MPC is estimated to be 77,666 hours.

Exhibit 2 shows the estimated annual cost burden associated with the respondents' time to participate in this information collection. The annual cost burden for the MEPS-HC is estimated to be \$1,438,233; the annual cost burden for the MEPS-MPC is estimated to be \$291,595. The total annual cost burden for the MEPS-HC and MPC is estimated to be \$1,729,828.

The MEPS-MPC interviewer will be authorized to offer remuneration to providers who present cost as a salient objection to responding or if a flat fee is applied to any request for medical or billing records. Based on the past cycle of data collection fewer than one third of providers will request remuneration. Exhibit 3 shows the total and average per record remuneration by provider type, based on the 2016 data collection, the most recent year for which data is available. For those providers that required remuneration the average payment per medical record was \$37.80, this compares to \$32.98 in 2010.

EXHIBIT 1—ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Hours per response	Total burden hours
MEPS-HC				
MEPS-HC Core Interview	* 13,338	2.5	92/60	51,129
Adult Female SAQ	12,984	1	7/60	1,515
Adult Male SAQ	11,985	1	7/60	1,398
Diabetes care SAQ	2,072	1	3/60	104
Veteran SAQ	1,350	1	15/60	338
Authorization form for the MEPS-MPC Provider Survey	12,804	5.4	3/60	3,457
Authorization form for the MEPS-MPC Pharmacy Survey	12,804	3.1	3/60	1,985
MEPS-HC Validation Interview	4,225	1	5/60	352
Subtotal for the MEPS-HC	71,562	na	na	60,278
MEPS-MPC				
MPC Contact Guide/Screening Call**	36,598	1	2/60	1,220
Home care for health care providers questionnaire	635	1.53	9/60	146
Home care for non-health care providers questionnaire	11	1	11/60	2
Office-based providers questionnaire	11,210	1.65	10/60	3,083
Separately billing doctors questionnaire	12,397	3.46	13/60	9,294
Hospitals questionnaire	5,310	3.26	9/60	2,597
Institutions (non-hospital) questionnaire	116	2.05	9/60	36
Pharmacies questionnaire	6,919	2.92	3/60	1,010
Subtotal for the MEPS-MPC	73,196	na	na	17,388
Grand Total	144,758	na	na	77,666

* While the expected number of responding units for the annual estimates is 12,804, it is necessary to adjust for survey attrition of initial respondents by a factor of 0.96 (13,338 = 12,804/0.96).

** There are 6 different contact guides; one for office based, separately billing doctor, hospital, institution, and pharmacy provider types, and the two home care provider types use the same contact guide.

EXHIBIT 2—ESTIMATED ANNUALIZED COST BURDEN

Form name	Number of respondents	Total burden hours	Average hourly wage rate	Total cost burden
MEPS-HC				
MEPS-HC Core Interview	13,338	51,129	*\$23.86	\$1,219,938
Adult Female SAQ	12,984	1,515	* 23.86	36,148
Adult Male SAQ	11,985	1,398	* 23.86	33,356
Diabetes care SAQ	2,072	104	* 23.86	2,481
Veteran SAQ	1,350	338	* 23.86	8,065
Authorization forms for the MEPS-MPC Provider Survey	12,804	3,457	* 23.86	82,484
Authorization form for the MEPS-MPC Pharmacy Survey	12,804	1,985	* 23.86	47,362
MEPS-HC Validation Interview	4,225	352	* 23.86	8,399
Subtotal for the MEPS-HC	71,562	60,278	na	1,438,233

EXHIBIT 3—TOTAL AND AVERAGE REMUNERATION BY PROVIDER TYPE FOR THE MEPS-MPC

Provider type	Number of records with payment	Average payment	Total remuneration
Hospital	1,718	\$43.99	\$75,575
Office Based Providers	678	33.88	22,971
Institutions	1	63.71	64
Home Care Provider (Health Care Providers)	4	78.50	314
Home Care Provider (Non-Health Care Providers)	0	0	0
Pharmacy	10,305	35.69	367,785
Separately Billing Doctors	412	70.60	29,087
Total MPC	13,118	495,796

Request for Comments

In accordance with the Paperwork Reduction Act, comments on AHRQ's information collection are requested with regard to any of the following: (a) Whether the proposed collection of information is necessary for the proper performance of AHRQ's health care research and health care information dissemination functions, including whether the information will have

practical utility; (b) the accuracy of AHRQ's estimate of burden (including hours and costs) of the proposed collection(s) of information; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information upon the respondents, including the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the Agency's subsequent request for OMB approval of the proposed information collection. All comments will become a matter of public record.

Francis D. Chesley, Jr.,
 Acting Deputy Director.
