

Nonrespondents to the web or mail questionnaire will be followed up by computer-assisted telephone interviewing. The individual's response to the survey is voluntary. The survey will be conducted in conformance with Census Bureau statistical quality standards and, as such, the NSCG data will be afforded protection under the applicable Census Bureau confidentiality statutes.

*Use of the Information:* The NSF uses the information from the NSCG to prepare congressionally mandated reports such as *Women, Minorities and Persons with Disabilities in Science and Engineering* and *Science and Engineering Indicators*. A public release file of collected data, designed to protect respondent confidentiality, will be made available to researchers on the internet.

*Expected Respondents:* A statistical sample of approximately 130,000 individuals will be contacted in 2019. NSF expects the response rate to be 70 to 80 percent.

*Estimate of Burden:* The amount of time to complete the questionnaire may vary depending on an individual's circumstances; however, on average it will take approximately 30 minutes to complete the survey. NSF estimates that the total annual burden will be no more than 52,000 hours (=130,000 individuals × 80% response × 30 minutes) during the 2019 survey cycle.
