

regulating biotechnology products: APHIS, the Environmental Protection Agency, and the Food and Drug Administration. This document addresses only proposed changes to the APHIS regulations and is not intended to circumscribe, restrict, or otherwise preclude future actions taken by other Federal agencies under their respective authorities.

During the past 30 years, there have been major advances in the science of biotechnology, and new issues have been brought to APHIS' attention by a range of stakeholders. Over this period, APHIS has also gained considerable experience in assessing the plant health risks of GE organisms. Accordingly, APHIS is considering amending the regulations pertaining to movement and outdoor use of certain GE organisms to address the advances in biotechnology and APHIS' understanding of the issues raised by stakeholders. The proposed revisions would allow APHIS to more effectively protect plant health under the PPA by focusing APHIS' regulations in 7 CFR part 340 on risks that may be posed by certain GE organisms rather than on the methods used to produce the products and would also make the regulatory processes more transparent while removing unnecessary regulatory burdens.

Under the provisions of the National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), Federal agencies must examine the potential environmental impacts of proposed Federal actions and alternatives. We are planning to prepare a programmatic environmental impact statement (EIS) in connection with the proposed revisions to APHIS' biotechnology regulations that are being considered. Aspects of the human environment that may be affected by the proposed regulatory changes and that we have preliminarily identified for evaluation in the EIS will include potential impacts on:

- U.S. agriculture and forestry production (*e.g.*, conventional, biotechnology-based, and organic);
- Current and future uses of certain GE organisms in agriculture and forestry;
  - Agronomic practices employed in GE crop production that may have environmental consequences or effects (*e.g.*, tillage, crop rotation, weed and pest control, and agronomic inputs);
  - Aspects of the physical environment, including soil quality, water resources, and air quality, with consideration given to the effects of dynamic climate conditions;
  - Aspects of the biological environment, such as animal and plant

communities, the development of weed, pathogen, and insect resistance to pesticides, the potential gene flow from certain GE organisms to sexually compatible species, the weediness of GE crop plants, and biodiversity;

- Consumer health and agricultural worker safety; and
- Animal feed safety, availability, quality, and animal health.

We will also examine socioeconomic considerations, such as the potential impacts of crop plants that are GE organisms on the domestic economic environment, international trade, and coexistence among all forms of U.S. agriculture—conventional, biotechnology-based, and organic—and on market demand for food, feed, fiber, and fuel.

The EIS will be prepared in accordance with: (1) NEPA, (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) U.S. Department of Agriculture regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

This notice identifies the potential issues that will be evaluated in the EIS, and requests public comment to help APHIS further define the issues and alternatives that should be considered and to help APHIS identify additional impacts, both positive and negative, to the human environment that should be examined in the EIS. Public input will also be helpful in developing our proposed regulations. All comments received during the comment period will be carefully considered. A notice will be published in the **Federal Register** to announce the availability of the draft EIS when it is issued and to invite the public to provide comments.

Done in Washington, DC, this 26th day of June 2018.
