Before doing so, EPA is soliciting public comments on specific aspects of the proposed information collection as described below. This is a proposed extension of the ICR, which is currently approved through December 31, 2018. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA

will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: The EPA promulgated the Air Emissions Reporting Requirements (AERR) (40 CFR part 51, subpart A) to coordinate emissions inventory reporting requirements with existing requirements of the Clean Air Act and 1990 Amendments. Under this reporting, 55 state and territorial air quality agencies, including the District of Columbia, as well as an estimated 49 local air quality agencies, must submit emissions data every 3 years for all point, non-point, on-road mobile, and non-road mobile sources of volatile organic compounds, oxides of nitrogen, carbon monoxide, sulfur dioxide, particulate matter less than or equal to 10 micrometers in diameter, particulate matter less than or equal to 2.5 micrometers in diameter, ammonia, and lead.

In addition, the air quality agencies must submit annually emission data for point sources with the potential to emit at greater than specified levels of those pollutants. The data supplied to the emission reporting requirement is needed so that the EPA can compile and make available a national inventory of air pollutant emissions. A comprehensive inventory updated at regular intervals is essential to allow the EPA to fulfill its mandate to monitor and plan for the attainment and maintenance of the national ambient air quality standards established for criteria pollutants.

The number and frequency of data collection and submittal is expected to remain the same for 2019-2021.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are generally state, territorial and local government air quality managements programs. Tribal governments are not affected unless they have sought and obtained treatment as state status under the Tribal Authority Rule and on that basis, are authorized to implement and enforce the AERR rule.

Respondent's obligation to respond: This information is collected under 23 U.S.C. 101; 42 U.S.C 7401-7671q, and the authority of the AERR. This information is mandatory and, as specified, cannot be treated as confidential by the EPA.

Estimated number of respondents: 104 (total).

Frequency of response: Annual.

Total estimated burden: 58,740 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$5,446,444 (per year), includes \$116,480 annualized capital or operation & maintenance costs.

Changes in estimates: There is no change in hours in the total estimated respondent burden compared with the ICR currently approved by OMB.

Dated: June 6, 2018.

Director, Air Quality Assessment Division,
Office of Air Quality Planning and Standards.
