## DEPARTMENT OF ENERGY

[OE Docket No. EA-342-B]

### Application To Export Electric Energy; Royal Bank of Canada

**AGENCY:** Office of Electricity,  
Department of Energy.

**ACTION:** Notice of application.

**SUMMARY:** Royal Bank of Canada (Applicant or RBC) has applied to renew its authority to transmit electric energy from the United States to Canada pursuant to the Federal Power Act.

**DATES:** Comments, protests, or motions to intervene must be submitted on or before August 13, 2018.

**ADDRESSES:** Comments, protests, motions to intervene, or requests for more information should be addressed to: Office of Electricity, Mail Code: OE-20, U.S. Department of Energy, 1000 Independence Avenue SW, Washington, DC 20585-0350. Because of delays in handling conventional mail, it is recommended that documents be transmitted by overnight mail, by electronic mail to [Electricity.Exports@hq.doe.gov](mailto:Electricity.Exports@hq.doe.gov), or by facsimile to 202-586-8008.

**SUPPLEMENTARY INFORMATION:** The Department of Energy (DOE) regulates exports of electricity from the United States to a foreign country, pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. §§ 7151(b) and 7172(f)). Such exports require authorization under section 202(e) of the Federal Power Act (16 U.S.C. § 824a(e)).

On September 10, 2013, DOE issued Order No. EA-342-A to RBC, which authorized the Applicant to transmit electric energy from the United States to Canada, effective September 4, 2013, as a power marketer for a five-year term using existing international transmission facilities. That authority expires on September 4, 2018. On February 28, 2018, RBC filed an application with DOE for renewal of the export authority contained in Order No. EA-342-A for an additional five-year term.

RBC's application states that "[n]either RBC nor any of its affiliates (collectively, the 'RBC Companies') owns, operates or controls any electric power transmission or distribution

facilities in the United States," and that "[t]he RBC Companies also do not own, operate or control any electric generation assets." Further, "[n]either RBC nor any of its affiliates holds a franchise or service territory for the transmission, distribution or sale of electric power." The electric energy that RBC proposes to export to Canada would be surplus energy purchased from third parties such as electric utilities and Federal power marketing agencies pursuant to voluntary agreements. The existing international transmission facilities to be utilized by RBC have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

*Procedural Matters:* Any person desiring to be heard in this proceeding should file a comment or protest to the application at the address provided above. Protests should be filed in accordance with Rule 211 of the Federal Energy Regulatory Commission's (FERC) Rules of Practice and Procedure (18 CFR 385.211). Any person desiring to become a party to this proceeding should file a motion to intervene at the above address in accordance with FERC Rule 214 (18 CFR 385.214). Five (5) copies of such comments, protests, or motions to intervene should be sent to the address provided above on or before the date listed above.

Comments and other filings concerning RBC's application to export electric energy to Canada should be clearly marked with OE Docket No. EA-342-B. An additional copy is to be provided directly to both Chantal Marchese, Royal Bank of Canada, 200 Bay Street, 10th Floor, North Tower, Toronto, Ontario, Canada M5J 2J5, and Marcus Chun, RBC Capital Markets, 200 Bay Street, 9th Floor, South Tower, Toronto, Ontario, Canada M5J 2J2.

A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after DOE determines that the proposed action will not have an adverse impact on the sufficiency of supply or reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above, by accessing the program website at <http://energy.gov/node/11845>, or by emailing Angela Troy at [Angela.Troy@hq.doe.gov](mailto:Angela.Troy@hq.doe.gov).

Issued in Washington, DC, on July 6, 2018.
