### National Agricultural Statistics Service

*Title:* Field Crops Production.

*OMB Control Number:* 0535–0002.

*Summary of Collection:* The primary functions of the National Agricultural Statistics Services' (NASS) are to prepare and issue State and national estimates of crop and livestock production, disposition, and prices and to collect information on related environmental and economic factors. The Field Crops Production Program consists of probability field crops surveys and supplemental panel surveys. These surveys are extremely valuable for commodities where acreage and yield are published at the county level. NASS will use surveys to collect information through a combination of the internet, mail, telephone, and personnel interviews. The general authority for these data collection activities is granted under U.S. Code Title 7, Section 2204.

*Need and Use of the Information:* NASS collects information on field crops to monitor agricultural developments across the country that may impact on the nation's food supply. The Secretary of Agriculture uses estimates of crop production to administer farm program legislation and import and export programs. Collecting this information less frequently would eliminate the data needed to keep the Department abreast of changes at the State and national level.

*Description of Respondents:* Farms; Business or other for-profits.

*Number of Respondents:* 626,115.

*Frequency of Responses:* Reporting: Weekly, Monthly, Quarterly, Annually.

*Total Burden Hours:* 181,411.
