We are issuing this AD to address safety pins that had been installed on the inflation reservoirs of escape slides/slide rafts during production but had not been removed, which would prevent deployment of the escape slide/slide raft when required in case of emergency and could result in injury to the occupants.

(g) Definition of Affected Escape Slides/Slide Rafts

For purposes of this AD, affected escape slides/slide rafts are those installed on the left-hand and right-hand forward and aft passenger doors.

(h) Inspection

Within 750 flight hours, or 750 flight cycles, or 4 months, whichever occurs first after the effective date of this AD, do a general visual inspection of each affected escape slide/slide raft to determine whether the safety pin is installed on the slide inflation reservoir, in accordance with Airbus Alert Operators Transmission A25N012-17, Revision 02, dated May 29, 2018.

(i) Corrective Action

If, during the inspection required by paragraph (h) of this AD, a safety pin is found installed, before further flight, remove and stow the affected pin, in accordance with Airbus Alert Operators Transmission A25N012-17, Revision 02, dated May 29, 2018.

This paragraph provides credit for actions required by paragraphs (h) and (i) of this AD, if those actions were performed before the effective date of this AD using the service information identified in paragraph (j)(1) or (j)(2) of this AD.
