

reasons why a hearing on the application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Jennifer Skidmore or Sara Young (301) 427-8401.

SUPPLEMENTARY INFORMATION: The subject amendment to Permit No. 21217 is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*) and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

Permit No. 21217, issued on November 6, 2017 (82 FR 60968; December 26, 2017), authorizes the permit holder to import biological samples from up to 30 harp seals (*Pagophilus groenlandicus*) and 30 hooded seals (*Cystophora cristata*) from Canada to study the effects of polybrominated diphenyl ethers (PBDEs) on the fitness and immune function in two species of phocid seals. The permit holder is requesting the permit be amended to increase the number of samples imported from each species from 30 to 60 individuals and to include the import of samples collected during the 2019 field season in Canada. All other aspects of the permitted activities would not change.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the proposed activities are categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of these applications to the Marine Mammal Commission and its Committee of Scientific Advisors.
