This is accomplished by, (1) coordinating and providing research training and career development activities for fellows

and trainees in NCI's laboratories, clinics, and other research groups, (2) developing, coordinating, and implementing opportunities in support of cancer research training, career development, and education at institutions nationwide, and (3) identifying workforce needs in cancer research and adapting NCI's training and career development programs and funding opportunities to address these needs. The proposed information collection involves a website to collect and maintain resumes of interested candidates to be considered for postdoctoral fellowships and internships in science. After posting their resume in the database, NCI Scientists can view and select candidates for current fellowship and internship opportunities offered at NCI.
