Abstract: The regulations under 30 CFR 250, subpart J, pertain to pipelines and pipeline rights-of-way (ROWs), forms, and related Notices to Lessees (NTLs) and Operators.

We use the information to ensure that lessees and pipeline ROW holders design the pipelines that they install, maintain, and operate in a safe manner. BSEE needs information concerning the proposed pipeline and safety equipment, inspections and tests, and natural and manmade hazards near the proposed pipeline route. BSEE uses the information to review pipeline designs prior to approving an application for a ROW or lease term pipeline to ensure that the pipeline, as constructed, will provide for safe transportation of minerals through the submerged lands of the OCS. BSEE reviews proposed pipeline routes to ensure that the pipelines would not conflict with any State requirements or unduly interfere with other OCS activities. BSEE reviews proposals for taking pipeline safety equipment out of service to ensure alternate measures are used that will properly provide for the safety of the pipeline and associated facilities (platform, etc.). BSEE reviews notifications of relinquishment of ROW grants and requests to decommission pipelines for regulatory compliance and to ensure that all legal obligations are

met. BSEE monitors the records concerning pipeline inspections and tests to ensure safety of operations and protection of the environment and to schedule witnessing trips and inspections. Information is also necessary to determine the point at which the DOI or Department of Transportation (DOT) has regulatory responsibility for a pipeline and to be informed of the identified operator if not the same as the pipeline ROW holder.

We use the information in Form BSEE-0149, Assignment of Federal OCS Pipeline Right-of-Way Grant, to track pipeline ROW holders; as well as use this information to update the corporate database that is used to determine what leases are available for a Lease Sale and the ownership of all OCS leases.

We are adding a new Form BSEE-0135, Designation of Right-of-Way Operator, to identify who has the authority to act on the ROW grant holder's behalf to fulfill obligations under the OCS Lands Act; as well as, BSEE may provide to the designated ROW operator written or oral instructions in securing compliance with the ROW grant in accordance with applicable laws and regulations.

Title of Collection: 30 CFR part 250, subpart J, *Pipelines and Pipeline Rights-of-Way (ROW)*.

OMB Control Number: 1014-0016.

Form Number: BSEE-0149—

Assignment of Federal OCS Pipeline Right-of-Way Grant, and Form BSEE-0135—Designation of Right-of-Way Operator.

Potential respondents comprise Federal OCS oil, gas, and sulfur lessees/operators and holders of pipeline rights-of-way.

Total Estimated Number of Annual Respondents: Not all of the potential respondents will submit information in any given year, and some may submit multiple times.

Total Estimated Number of Annual Responses: 2,961.

Estimated Completion Time per Response: Varies from 30 minutes to 107 hours, depending on activity.

Total Estimated Number of Annual Burden Hours: 34,560.
